🏛 PROFESSIONAL EXPERIENCE

Software Test Engineer / Quality Assurance Engineer - SaaS
Appointy India
Jun 2021 – Present | Bhopal, India

- Solely managed comprehensive testing for enterprise software projects, ensuring perfection across diverse client modules.
- Streamlined testing processes at Appointy, enhancing team efficiency.
- Identified and implemented improvements for hiring, onboarding, and training processes.
- Demonstrated strong multitasking abilities and consistently delivered quality results.
- Mapped business requirements to relevant test cases, executed them, and identified automation opportunities.
- Developed and executed Web and Mobile automation test cases.
- Conducted thorough cross-browser testing in Chrome and Firefox.
- Utilized Selenium and Appium for test execution, defect tracking, and closure.
- Actively participated in daily standup meetings, collaborating on test case creation and defect resolution.

🏛 PROJECTS

Appointy X Testing and Integration
Continuously testing enterprise products built on Appointy X platform to ensure functionality and address client needs.
Mathnasium: Testing for team and pod teaching support.
J&J: Integrated ServiceNow for streamlined bug reporting.
Google Canada: Validated admin-end updates leveraging Appointy X.
Sitback: Developed custom permissions and customer-staff features.
Yale: Enhanced login with teacher and student details.
Worksolution: Customized with an intake form and unique roles.
Dictionary: Implemented automated discount code generation.
Knoxx: Tested product flow for enterprise users with a guest login.
UBC: Customized Appointy X for seamless SSO integration.

📂 DEMO PROJECTS

eBay Automation ⧉
Tech Stack: Selenium WebDriver, Java, TestNG, ExtentReports, Maven, Page Object Model (POM)

Summary: The eBay automation project aims to automate testing for eBay's web application. It covers functionalities such as user interaction, applying filters, navigating categories, and verifying critical features like adding items to the cart and completing transactions.

Pet Store API Automation ⧉
Tech Stack: Java, Rest Assured, TestNG, Extent Reports, Maven

Summary: The project automates testing for a Pet Store's REST API, covering functionalities like pet management, store orders, and user interactions. It ensures API reliability through comprehensive testing of critical endpoints and edge cases.
