
Arjun Reddy

arjunworkmail@gmail.com

217-848-0810

Summary:

- **8+ years** of Progressive experience in IT industry analyzing, designing, coding and maintenance of software applications, using **Java/ J2EE, Web Technologies** and **Hybris**.
- **5+ years** of experience in **Hybris** which involves working modules like **Facades, Core, WCMS, PCM, acceleratorStoreFront, CCv1, CCv2, Datahub** and **Promotions**.
- Expert level skills in designing and implementing Java, J2EE, JEE technologies such as **Spring, Hibernate, SOAP/Rest web services, Struts, JMS, JDBC, Servlets, Java Server Pages, JQuery, JavaScript** and **AJAX**.
- Vast experience in all phases of **Software Development/SDLC** using **SCRUM, Agile/XP, Waterfall, Rational Unified Process** and **Iterative methodologies**.
- Experience in developing Web Applications with various OpenSource frameworks: **MVC architecture, spring, Hibernate ORM**.
- Expert on Object to Relational Mapping (ORM) technologies such as Hibernate, **JPA** and Spring JDBC.
- Experience in developing Web Services using - **SOAP, REST, WSDL** and developing **DTDs, XSD** schemas for **XML** (parsing, processing, and design).
- Experience in software testing, Junit testing, regression testing, defect tracking and management.
- Strong experience in establishing/configuring the application infrastructure using application servers (**WebLogic, Web Sphere, Apache Tomcat**).
- Hands on experience with Tools & **Utilities: Maven, Ant** and CI servers like **Jenkins, SVN, PVCS, Clear Case**.

Technical Skill Set:

Hybris Modules	Core, Facades, Cockpits, HMC, HAC, Payment, StoreFront, Cart, CheckOut, Order Management, CCv1, CCv2, and Promotions.
Frameworks	Spring 4.x/3.x/2.x, Hibernate 3.0/2.1, Struts 2.0/1.2
J2EE	Servlets, JSP, JSTL, JMS1.1, JDBC, Junit, JNDI Web Services, XML, JAXB, DOM, SAX, Multi-threading, and JTA.
Web Technologies	JQuery, Html, JavaScript, CSS and AJAX.
Database	Oracle, DB2, SQL Server
Testing Frame Works	Junit, Groovy
Tools	UML, Rational Rose, Splunk, DynaTrace, Kibana, JRebel, SQL Developer, TOAD, Hudson, Jenkins, Ant, Maven, Log4J, SOAPUI, Putty, JIRA, Rest Client UI, PostMan

Operating Systems	Unix, Linux, Windows
Web/App-Servers	Tomcat, WebSphere, WebLogic
IDEs	Eclipse, NetBeans, IntelliJ
Methodologies	Waterfall Model, Iterative, Agile, Test Driven Development.
Version Control Systems	CVS, SVN, GitHub, Bitbucket

Education: -

Master's in Computer Science, Indiana State University, USA

Bachelor of Technology – Computer Science, JNTU-H, India

PROFESSIONAL SUMMARY: -

SAAQ - IBM, Quebec, CA

Role: **Hybris** Developer

Duration: Jul 2021 to Present

Responsibilities:

- Analyze, Design and Develop applications in **Hybris** E-commerce Platform.
- Create **Hybris** E-commerce applications, designs that mesh with client's architectural guidelines, best practices, **Agile** Timelines.
- Worked on Integrating **Hybris** and **RedHat SSO** for login and authentication, and user creation.
- Worked on **FTL** pages
- Worked different e-commerce functionalities like **data modelling**, impex import/export, **flexible** search queries, **cronjobs**, validations, interceptors.
- Worked on **Backoffice** customization and **HAC**.
- Providing **Hybris** application expertise and representation to our product owners and business partners.
- Participate in code reviews and discussions.
- Co-ordinated with multiple teams, along with offshore teams (India)

Environment: **SAP Hybris** 2105, RedHat SSO, Java 11, Maven, Spring, MYSQL, Groovy, GIT, Kibana, Rest Services, IntelliJ, Agile, Azure DevOps, Apache Tomcat.

Ford Motors, Detroit, MI

Role: **Hybris** Developer

Duration: June 2019 to Jul 2021

Responsibilities:

- Analyze, Design and Develop applications in **Hybris** E-commerce Platform.
- Create **Hybris** E-commerce applications, designs that mesh with client's architectural guidelines, best practices, **Agile** Timelines.
- Create new extensions on **Hybris** platform to support different e-commerce functionalities like **data modelling**, **product** and price **catalog** management, impex import/export, **flexible** search queries, **cronjobs**, validations, interceptors and SOLR Search.
- Develop Commerce functionalities like **Dealer Search**, **Inventory Search**, **Customer profile**, **Cart**, **Order**, **Delivery**, **Pricing**, **Stock** availability, **Payment** etc.
- Develop and deliver proof-of-concept demonstrations. **Backoffice** customization and **HAC. CMS cockpit** customization for Content management systems.
- Actively participating in designing and development of **dashboards** creation such as order count by country, region, date, vehicle battery types, vehicle models.
- Actively participating in designing and development of vehicle pre-order and confirm order business process having features like vehicle specification **amendment**, **payment capture** and **refund**, customer **email notification**.
- Worked on Integration with internal ford teams like IAL, GOMS, Dealer systems using rest services for sending notifications synchronously.
- Providing **Hybris** application expertise and representation to our product owners and business partners.
- Participate in code reviews and discussions.
- Worked on multiple catalogs, markets (NA, EU, UK)
- Co-ordinated with multiple teams, along with offshore teams (India, UK)
- Closely associate with Business teams to **support** and fix **production** issues

Environment: **SAP Hybris** 1905 CCv2, Java 11, Spring, Spring Boot, MYSQL, Groovy, Junit, Jenkins, PCF, GIT, Kafka, Kibana, Dynatrace, Rest Services using Feign, IntelliJ, Wire Mock, Agile, JIRA, Apache Tomcat.

Zekelman Industries, Chicago, IL

Role: **Hybris** Developer

Duration: Dec 2017 to June 2019

Responsibilities: -

- Worked on **Upgrade Project**, from **Hybris 5.5** to **Hybris 6.5**, along with **Production Support**
- Involved in developing some of the key functionalities like **Login, Cart, Quote, Checkout, B2B, and Order Management**
- Worked with **WCMS Cockpit** and developed **CMS** Components for Web Pages
- Developed **CronJobs** for deleting **Saved carts, duplicate Agents**
- Worked on multiple **Storefronts**
- Implemented **Auto Suggestion** functionality for searching
- Worked on **Orders, Order Search/History**
- Worked on complex **Flexible Search Queries**, and **CronJobs**
- Worked on **impex** scripts, **Items.XML** and knowledge on **SOLR**.
- Knowledge on **Hot Folder** functionality
- Responsible for fixing the bugs in **FST, UAT, Regression** testing and **production** support.
- Used **JIRA** for Project Management, and **Bitbucket** for code repository
- Interaction with **Functional Analyst, and Business Analyst** to analyze and reduce the requirement gap.
- Worked in a fast paced, **Agile Environment**, with Daily status meetings
- Co-ordinated with multiple teams, along with offshore team
- Supported the team in solving the key issues and always been a good team player.

Environment: **Hybris 6.5/6.7, Hybris 5.5, SQL Server 2016, HTML, CSS, JavaScript, JQuery, Webservices, Windows, Eclipse, Agile, GIT, JIRA, Jrebel, Auto Suggestion, Bitbucket, Apache Tomcat, Ant.**

Boeing, Renton, WA

Role: **Hybris Developer**

Duration: Feb 2017 to Dec 2017

Responsibilities:

- Participated in requirement gathering, analysis, and design
- Implemented **Address validation functionality** to validate from **SAP**
- Worked with **datahub** as middleware for data transfer.

- Worked on initial data setup and **data modeling**.
- Worked on various **cronjobs**
- Worked on **Cart** and **checkout** customization.
- Implemented **promotions** and **vouchers**
- Worked on **Agile** methodology.
- Integrated vertex for tax calculations.
- Order calculation customization based on shipping methods
- Interaction with business team to analyze and reduce the requirement gap.
- Supported the team in solving the key issues and always been a good team player.

Environment: **Hybris** 6.2, HTML, CSS, JavaScript, JQuery, Webservices, GIT, Jenkins, Windows, Eclipse, DataHub, Apache Tomcat, Ant.

Samsung, Chicago, IL

Role: **Hybris** Developer

Duration: Jul 2016 to Feb 2017

Responsibilities:

- Developed some of the key functionalities of an ecommerce website like **customer login, search, product listing page, order capturing, cart and payment integrations**.
- Involved in development of promotion engine which implements the **promotions** and **vouchers** on website.
- Developed the **catalog** and **content system** which uses the **hybris** content management system.
- Developed some **cronjobs** for sending email templates which includes **promotions, vouchers** and **payments**.
- Involved in development of **webservices** which integrates with downstream systems of the client like **order management system** and **warehouse management system**.
- Had a very good experience in working on **flexible search queries**.
- Worked on **impex** scripts.
- Configured **datahub E2E** solution for integration with **ERP**.
- Worked on writing the **BTG** rules for **user, order, cart and website**.
- Responsible for fixing the bugs in **FST, UAT, Regression** testing and **production** support.

- Implemented adapters for **Datahub** data translation.
- Used **Google Web Analytics** to track and measure visitors, traffic sources, goals, conversion.
- Interaction with business team to analyze and reduce the requirement gap.
- Supported the team in solving the key issues and always been a good team player.
- Used **Google Tag Manager** to manage analytics.

Environment: **Hybris 5.1**, **Endeca**, **Oracle 11g**, **HTML**, **CSS**, **JavaScript**, **JQuery**, **Webservices**, **SVN**, **Windows**, **Eclipse**, **Apache Tomcat**, **Ant**.

Client: Nike, Beaverton, OR

Role: Java Developer

Duration: July 2014 to Jul 2016

Responsibilities:

- Interacted with the functional analyst and the business to gather client requirements to design and develop the application.
- Designed and developed the Web Application leveraging a Struts framework.
- Leveraged Spring with the Struts Framework to develop the application.
- Implemented the persistence layer with Hibernate and configured Hibernate with Spring to interact with the Oracle Database from the DAO.
- Created custom tags for JSP to maximize the re-usability of user interface components.
- Wrote JSP and HTML for the presentation of data.
- Implemented MVC Architecture leveraging the Struts Framework.
- Created Action and View classes with beans and integrated them through Struts Config.
- Developed internationalized JSP pages leveraging resource bundles and Servlets for the Presentation tier and for the Action Servlet.
- Utilized Display Tag, CSS, amp, JavaScript, and jQuery.
- Wrote deployment descriptor and configuration files with XML.
- Developed session beans for the necessary transactions in the application.
- Gained an understanding of the OLAP processing to change and maintain the warehousing optimizing dimensions and hierarchies and add the aggregations to the Cube.
- Developed the ANT Script to build the application and deploy it on the JBoss Application Server.
- Leveraged JDBC to access the Database, and SOAP UI to verify the WSDL end URL.
- Tested components with JUnit during development.
- Developed SQL queries and leveraged stored procedures to perform transactions with Oracle.

- Collaborated with a group to build the back-end infrastructure of the Oracle database.

Environment: JDK, J2EE, Javascript, JSP, HTML, CSS, Servlets, JDBC, JBoss, XML, HTML, Struts, spring, Oracle 8i, Eclipse, WebSphere, JUnit, UNIX, SOAP UI, CVS, SOAP and Rest Web services, Agile Development.

Client: Citi Bank, Hyderabad, India

Role: Java/J2EE Developer

Duration: May 2011 to Aug 2012

Responsibilities:

- Worked in an agile work environment with **Content Management system** for workflow management and content versioning.
- Involved in designing user screens and validations using **HTML, jQuery, Ext JS** and **JSP** as per user requirements.
- Responsible for validation of Client interface **JSP** pages using Struts form validations.
- Used Spring Dependency Injection properties to provide loose-coupling between layers. Implemented the Web Service client for the login authentication, credit reports and applicant information using Apache **Axis 2 Web Service**.
- Used Web services (**SOAP**) for transmission of large blocks of **XML** data over **HTTP**.
- Used **Hibernate** ORM framework with **Spring** framework for data persistence and transaction management.
- Used **Hibernate** object relational data mapping framework to persist and retrieve the data from database.
- Wrote **SQL** queries, stored procedures, and triggers to perform back-end database operations.
- Developed **ANT** Scripts to do compilation, packaging and deployment in the **WebSphere** server.
- Implemented the logging mechanism using **Log4j** framework.
- Wrote test cases in **JUnit** for unit testing of classes.

Environment: Java, JDK, J2EE, Agile Development Process, Struts, Spring, Web Services (JAX-WS, Axis 2) Hibernate, RSA, JMS, JSP, Servlets, WebSphere, SQL Server 2012, Windows XP, HTML, XML, SOAP, IBM Rational Application Developer (RAD), ANT, Log4J, XML, XSLT, XSD, jQuery, AngularJS, JavaScript, Ext JS, JUnit, SVN.
