*Email* - *Linkedin* - *Github* - *Tel: +1(346)515-94-65*

I am a Full-Stack/Backend Software Engineer with over 10 years of experience located in Houston, Texas.I have managed teams of developers to build multiple web and mobile applications annually, including leading a backend team of six. I have extensive experience in designing applications with Ruby on Rails for corporate clients, having gained expertise as a self-taught developer.

In 2019, I gained experience working remotely and have excellent communication skills in a remote environment with asynchronous work.I am proficient in using React, Vue, and other JavaScript frameworks for frontend development. Moreover, I am passionate about DevOps and technologies that facilitate CI/CD.I have experience working with AWS and Dockerizing applications, with a main expertise in Ruby on Rails and backend design.

As a technology enthusiast, I enjoy helping others and being a constructive team member. Over the past few years, I have grown both professionally and personally, thanks to my hard work, superior communication skills (both written and oral), and dedication to producing high-quality work. I have been an invaluable member of every company I have worked for.

## CAREER:

### FULL STACK RUBY ON RAILS DEVELOPER @ Prime Revenue
**MAR 2022 – Present**

- **Story:** I joined this supply chain finance company when I moved to the US. They have a large revenue and 50 big clients out of 500.

- **Achievements:** I was able to quickly adjust to the team and become an important member. I have added multiple values to the team, including helping to containerize and upgrade Rails, creating well-designed solutions for new integrations, and maintaining the developed parts of the applications by upgrading Vue from version 2 to version 3. In addition, we managed to change the authentication process from an in-app system to a 3rd party authenticator in a short amount of time. I was a major contributor to this change, from the requirement gathering phase to implementing the integration in a well-tested and well-designed manner.

### FULL STACK RUBY ON RAILS DEVELOPER @ SENITRON SOLUTIONS
**JULY 2019 – MAR 2022**

- **Story:** I joined this company to challenge myself as a full stack engineer and experience remote work, rather than being a lead backend or team lead.

- **Achievements:** I quickly became a valuable member of the team, adding multiple values such as designing solutions for new integrations, implementing CI/CD, improving test coverage, and assisting with client-facing activities.

## LEAD BACKEND DEVELOPER @ ROUND TABLE APPS
### JULY 2016 – JULY 2019

- **Story:** I led a team of six developers in an international company. We built and maintained scalable, well-structured applications for various clients and resolved complex problems. Our software was thoroughly tested before deployment.

- **Achievements:** I have developed multiple successful platforms for clients and SaaS businesses in recent years. These include MailPlus, SHFTHero, ICP, GPT Corp, TextFX, Financial Mindfulness, Migrate Live, and KanonHealth. I have also been responsible for maintaining existing applications. Our technology stack includes Ruby, Rails, React, Swift, and Java. I have overseen almost all aspects of the development process, including continuous integration and deployment (CI/CD) for DevOps.

## SOFTWARE ENGINEER @ SARIINA SOFTWARE SOLUTIONS
### APR 2015 – APR 2016

- **Brief:** As a full-stack developer, I have participated in the development of several applications.

## FOUNDER @ KLASSKO.
### APR 2014 – APR 2015

- **Brief:** A web base assistant for managing trainers

## FOUNDER AND DEVELOPER @ BESEPAR.
### MAY 2013 – MAY 2014

- **Brief:** A web based application for food catering and restaurant browsing

## PROJECTS:
### SENITRON RFID WEB APPLICATION
#### FULLSTACK SOFTWARE ENGINEER

- **Mission:** Senitron deploys RFID technologies to improve productivity, meet compliance demands, and reduce costs for businesses of all sizes. We help select, deploy, maintain, and service technology products that manage and integrate business, personal, or product data.

- **Stacks included:** Ruby on Rails, React, Redis, Sidekiq, AWS, PostgreSQL, LightSpeed integration

- **Links:** Senitron RFID Solution(Inventory Management)

### MAILPLUS
#### LEAD BACKEND ENGINEER

- **Mission:** We provide courier and mail services by aggregating available 3rd party courier services and creating a new interface for existing courier services. Our

platform also includes a Driver mobile application, customer and admin portals.

- **Achievements:** I constructed intricate solutions using design patterns and delivered well-designed APIs. Our scalable solution is being utilized by thousands of drivers, managing over 200,000 deliveries per month and millions of requests per month.
- **Stacks included:** Ruby on Rails, React, Redis, Docker, AWS, PostgreSQL, Shopify, OneSignal Integration, NetSuite data syncing and managing
- **Links:** [MailPlus Track](), [MailPlus Web](), [Driver App](), [Scan App](), [Shopify App]()

### SHFTHero
#### LEAD BACKEND ENGINEER

- **Mission:** SHFTHero is a digital marketplace connecting understaffed businesses in the hospitality industry with experienced job seekers for shift work.
- **Achievements:** I created a web and mobile app that streamlines communication between employers and employees.
- **Stacks included:** Ruby on Rails, React, Redis, Docker, AWS, PostgreSQL. Twilio, OneSignal, Stripe Integration
- **Links:** [SHFTHero Web Portals](), [SHFTHero Mobile Apps]()

### ICP(Investor Claim Partner Australia)
#### LEAD BACKEND ENGINEER

- **Mission:** ICP offers project management services for legal claims and also provides litigation funding.
- **Achievements:** I created a solution with two portals - one for ICP Staff and another for registrants. It helps simplify the process of registering claims, managing user data, and calculating claim losses.
- **Stacks included:** Ruby on Rails, React, Redis, Docker, AWS, PostgreSQL. Twilio, OneSignal Integration
- **Links:** [ICP Claim Services]()

## EDUCATION

### BACHELOR OF COMPUTER SCIENCE, UNIVERSITY OF TEHRAN

**Graduated on JUNE 2008**

## SKILLS

- *Ruby on Rails*
- *DevOps*
- *JavaScript*
- *Agile and Scrum*
- *Databases*

- *Containers and Docker*
- *AWS*
- *React*
- *Background Jobs*
- *Online Payments and 3rd Party integrations*
