Scrum Master

[Lasx Industries](#)

Sept 2017 - Feb 2018, Minneapolis

Ensures the development team(s) is operating as efficiently as possible and guides the team through reflection and continuous improvement and facilitates the key ceremonies of agile scrum.

Provides guidance to the team on a regular basis to ensure that the team is aligned with the organization in the processes to develop, release and maintain products.

Serves and supports the Product Owner and Development Team in their quest to do everything possible to meet the needs of the customers.

Provides support to the team using a servant leadership style.

Facilitates the scrum ceremonies including planning, stand-ups, retrospectives and grooming.

Removes impediments or guides the team to remove impediments by finding the right personnel to remove the impediment.

Facilitates discussions, decision making, and conflict resolution.

Assists with internal and external communication, improves transparency, and radiating information.

Supports the Product Owner, especially with respect to refining (aka grooming) and managing the product backlog.

Assists the Scrum Team with evaluating proper metrics to measure the performance of the team.

Scrum Master

Wells Fargo

Mar 2013 - Dec 2015, Minneapolis, MN

Consult on complex initiatives with broad impact and large-scale planning for Scrum or Agile.

Review and analyze complex multi-faceted, larger scale, or longer-term Scrum Master challenges that require in-depth evaluation of multiple factors, including intangibles or unprecedented factors.

Contribute to the resolution of complex and multi-faceted situations requiring solid understanding of the function, policies, procedures, and compliance requirements that meet deliverables.

Strategically collaborate and consult with client personnel.
