EXPERIENCE OVERVIEW

Experienced Software Engineer and Technical Leader with a robust hands-on background, offering expertise in guiding engineering teams. Proficient in deploying and supporting large-scale software for enterprise-wide initiatives, adept at leading teams, and cultivating talent. My experience encompasses technical architecture, software development, Object-Oriented development, database management, and process improvement. Demonstrated ability to prioritize and successfully complete complex tasks.

SKILLS/INTERESTS

- Methodologies: Agile, Kanban, TDD, BDD
- Tools: Git, Selenium, Gherkin, Jmeter, TestNG, Maven, Kafka, OpenShift, JIRA, Postman
- Databases: MongoDB, PostgreSQL, NoSQL
- Languages: Java, Spring Framework, ReactJS, Cypress, AngularJS, GoLang, Python
- CI/CD: Jenkins, GitLab CI, Codefresh, CircleCI
- Logging: Datadog, Dynatrace, Splunk, SumoLogic
- Configuration Management: Ansible, Chef, Puppet, Docker
- Cloud: AWS Services, Azure, GCP

PROFESSIONAL EXPERIENCE

Accenture

Principal Software Engineer

Atlanta, GA

May 2022 – Present

- Direct hands involvement in building / coding Microservices, and conducting code reviews
- Provided engineering solution guidance to solution architects
- Managed an Agile product team of 6 Software developers, 2 QA Engineers, and Product owners that are responsible for building a digital self-service option for client business
- An advocate for the engineering team and integration technology of choice to other domain teams
- Provided leadership and direction to engineering teams based on architectural best practices, and, when necessary defined or modified the architecture to accommodate solution needs and maintain quality
- Leveraged analytics and product experimentation techniques to raise product's Customer Satisfaction score to 90%.

Delta Airlines

Senior Software Engineer

Atlanta, GA

Oct 2021 – May 2022

- Provided production support for critical enterprise applications used by the Digital Channels team.
- Design and develop cloud-native applications, features, and enhancements with an emphasis on clean, highly efficient, supportable, and well documented code for the full technological stack.
- Communicated effectively with leadership, business partners and vendors.
- Translate complex business requirements into functional code.
- Developed automated unit, integration, and e2e tests.

State Farm

Senior Software Engineer

Atlanta, GA

Jul 2015 – Sept 2021

- Redesigned, Re-wrote customer facing web-based applications using AngularJS with interaction with Java springboot.
- Handled migration of applications from technical platform to Cloud based technology.
- Capitalize on software engineering expertise to troubleshoot complex issues for various projects.
- Worked closely with business partners to understand business requirements to design quality technical solutions that align with business and IT strategies and comply with the organization's architectural standards.
- Automated build and deployment process with Gitlab CI, eliminating 80% of manual work.

Web MD

Atlanta, GA

Software Quality Assurance Engineer

Jul 2014 – May 2015

- Spearhead for functional, system and integration testing of new and existing web based development applications.
- Collaborated with Product Management to aggregate business requirement documents and build functional test plans.
- Ensured that all test execution steps adhere to the WebMD web application standards
- Delivered project assignments on time, within budget and with high quality
- Performed work-flow analysis and recommend quality improvements
- Ensured all problems/issues and solutions are well documented
- Contributed to the identification, management and closure of system defect.

AIRWATCH by VMWare

Atlanta, GA

Software Quality Assurance Engineer

Nov 2012 – Jun 2014

- Developed Automated test script to integrate with Team Foundation Server and Microsoft test Manager
- Wrote scripts for web automation using Watir, Cucumber, Ruby
- Recorded detail test results with reports and general visibility of results
- Sought out expertise, knowledge, and resources to develop solutions to problems.
- Worked with development teams through the design and test stages to ensure strict adherence to business requirements and to improve upon new and existing features where applicable

EDUCATION

KENNESAW STATE UNIVERSITY, *Southern Polytechnic State University*
Bachelor of Science in Software Engineering (BSE) – Software Engineering

Marietta, GA
August 2014

GWINNETT TECHNICAL COLLEGE
Computer Information Systems - Computer Engineering

Lawrenceville, GA
May 2010

AWS Solution Architect Associate Certification

PROJECTS AND ORGANIZATIONS

- Lead developer for a Student Management System (Capstone Project at SPSU)
- Member of the Association for Computing Machinery
- Member of the Technology Association of Georgia
