Development Tools	:	Visual Studio Code, Sublime Text
Version Controls	:	GitHub, Bit bucket, node and NPM
Operating Systems	:	Windows, Mac OS

Professional Experience:

CureMetric Health Tech, Hyderabad

Angular Developer

April 2023 - March 2024

Miraki Technologies, Hyderabad

Angular Developer

July 2021 - Feb 2023

Enrich Aim, Hyderabad

UI Developer

Feb 2020 - May 2021

Projects:

1. CureMetric

This is a healthcare management application design for making the healthcare experience easier for everyone. There are modules like User, Doctor, Pharmacy, Diagnostic centers, Nutritionist, Caretaker, and Clinic present in a single application. User may book doctor appointment; Doctor will conduct video or chat and give appropriate prescription to the user and user can take that prescription, if the prescription contains only medicines, user can send it to the pharmacy. If the prescription contains tests like x-ray, MRI etc. user can send it to the diagnostic center. The pharmacy people will look into that prescription and generate invoice and send it to the user. User can see the invoice generated by pharmacy and pay the bill. In the pharmacy side, they receive the money and deliver medicines to the user. User can track that order by using invoice Id. As like Nutritionist and Caretaker also work. Coming to the clinic side doctors, Nutritionists and Caretakers will registered under the clinic and create their own base schedules. User may select the available slots and book the appointments. This application helps to ensure that patients are empowered to manage their own healthcare.

Technologies Used: Angular, JavaScript, TypeScript, Angular Material, Bootstrap, HTML, CSS

Role: Angular Developer

Responsibilities:

- Design and Developed Complete module based on the project requirement.
- Worked on the Client-side validations (Reactive Forms) using Angular.
