Sr. Oracle Applications Techno-Functional Consultant
OAF ADF EDI WebAdi Expertise
Oracle ERP Cloud SAAS/PAAS Techno-Functional Consultant
maresh.guddeti@gmail.com
+1-8482198042
<https://www.linkedin.com/in/maheshguddeti>

Summary:

- 15 years of experience in oracle EBS 11i (11.5.9, 11.5.10.2) and 12i (12.0.3, 12.1.1, 12.1.3, 12.2.5, 12.2.7) and Oracle cloud (R12/R13).
- Primary area of expertise in ERP system is Oracle Financials, SCM and MFG, More than 5 Full life cycle and 3 multiphase implementations for Product, IT Infrastructure, Manufacturing, Cloud and Automobile clients.
- Expertise in Implementation and Support for Oracle-EBS projects in the functional & technical areas
- Manufacturing (INV, WIP, BOM, Pricing, Costing) Supply Chain Management (PO, OM) Financials (AP, AR, GL, XLA, CM, FA) Oracle WMS (WareHouse Management System), Trading Community Architecture (TCA), Enterprise Asset Management (EAM), Redprairie, OPM, ASCP and CRM modules.
- Expertise in Oracle i Modules (iSupplier Portal, iReceivables, iProcurement, iStore).
- Expertise in developing custom / customizing seeded Oracle Business Events, Advance Queues.
- Expertise in FBDI (file based data integrator) in oracle cloud financials and HCM.
- Expertise in oracle cloud reporting using XML/BI publisher.
- Expertise in developing Webservices and integration Oracle Cloud using APEX_WEB_SERVICE API.
- Expertise in developing SOAP, REST webservices in PLSQL using UTL_HTTP API.
- Expertise in designing and developing XSD schemas and validating with XML Payloads.
- Expertise in integration Oracle EBS with other systems using oracle SOA webservices and workflow business event and Advance queues..
- Experience in Oracle Database cloud services (DBCS) and Integration Cloud Services (ICS).
- Experience in oracle HRMS, Payroll, Benefits, Time & Labor and Project Accounting modules.
- Expertise in developing and customizing RICEW (Reports Interfaces Conversions Extensions and Workflows).
- Expertise in AME configuration and setups (Defining conditions, rules, transaction types) related to AP, PO and HR modules.
- Expertise in OAF new development, Customization, Personalizations and Extensions (VO, AM, CO).
- Expertise in developing and customizing ADF applications using (JDeveloper 12C).
- Expertise in ADF architecture, ADF development, Bounded & Unbounded task flows, ADF Bindings, ADF Faces, Managed beans, Facets, Layouts, Web service integration and APACHE POI (MS EXCEL integration) in ADF.
- Experienced in fully integrating EBS (12.1.3 and 12.2.X) to ADF using JAAS methodology.
- Experience in configuring Data source service (JDBC connections) in WebLogic server (10.3).
- Strong work experience on CUSTOM.pll, Reports 6i & 10g, Forms 6i & 10g, Oracle Alerts, XML Publisher, BI, Discoverer, SQL*Loader, Data Loader and Shell script.
- Expertise in using Advanced PLSQL coding concepts.
- Strong Experience in Performance Tuning: Tuning SQL, PLSQL, Reports, Forms, OAF & ADF pages.
- Production support / Implementation / experience.
- Usage of Change management and Version control tools for implementation and production support projects.
- Monitoring data volumes for developing interfaces / conversions to choose right design for PLSQL coding.
- Data fix and Code fix releases on weekly and monthly basis.
- Trouble shooting on error programs / Performance issue programs.
- Worked on Service Now, BMC, JIRA etc. ticketing software's.
- Worked on SVN, VAULT etc. version control and repository software's.
- Experience with Global Rollout Implementation projects.
- Experience with Splash BI reporting tool.
- Experience in developing third-party interfaces and integrating with oracle applications.
- Experience in Reviewing the code and setting up/maintaining coding standards.
- Experience in ODI (Oracle Data Integrator)
- Experience in OBIEE reporting tool.
- Strong work experience of Order to Cash and Purchase to Pay Business Cycles.
- Ability to install and setup Oracle Tools like Developer 6i/10g, Oracle 9i/10g, JDeveloper 9i/10g, Toad, SQL Optimizer and other tools.
- Worked on inbound and outbound Oracle EDI's (Electronic Data Interchange).
- Trained on Oracle Fusion HCM and Oracle Fusion Financials Cloud.
- Good Knowledge on SAAS, PAAS and IAAS types of cloud environments.
- Excellent inter-personal and problem solving skills.

Sr. Oracle Applications Techno-Functional Consultant
OAF ADF EDI WebAdi Expertise
Oracle ERP Cloud SAAS/PAAS Techno-Functional Consultant
maresh.guddeti@gmail.com
+1-8482198042
<https://www.linkedin.com/in/maheshguddeti>

Education:

- Masters in Computer Applications (MCA) from University of Madras, India in 2005 with 72%

Trainings Completed:

- Oracle Fusion Financials Cloud
- Oracle Fusion HCM Cloud
- Oracle Weblogic Administrator
- OBIEE and ODI
- Cassandra DB
- Python

Technical Skills:

- | | |
|--------------------------------|---|
| • ERP | • Oracle Manufacturing and Financial Applications (Oracle Applications 11.5.9, 11.5.10.2, 12.0.3, 12.1.1, 12.1.3, 12.2.X) |
| • Modules | • General Ledger, Payables, Receivables, Assets, Purchasing, Inventory, Order Management, Bills of Material and Work in Process, Oracle Alerts, Application Developer, System Admin, Supply Chain Management (SCM), EAM, HRMS, TCA, Payroll, Benefits and Advance Supply Chain Planning (ASCP), Oracle Alerts, Business Events. |
| • Oracle Tools | • WEBADI, EDI, Reports 10g/6i, Forms 10g/6i, Discoverer 4i, SQL plus, PL/SQL, OAF, BPEL (Business Process Execution Language) SQL Loader and Data Loader, WebLogic 10.3 |
| • Databases | • Oracle 10g/8i/9i, Knowledge on Cassandra DB. |
| • Programming Languages | • C, C++, Java, PLSQL, Python |
| • Database Tools | • TOAD, SQL Loader, SQL Optimizer, TK-Prof |
| • Report Tools | • XML Publisher, BI, Discoverer, OPTIO, Splash BI |
| • Tools | • Clear case, BMC, E-room, Remedy, Quintana, JDeveloper9i 10g, 11g and 12c Winscp3, Putty and FTP |
| • Operating Systems | • DOS, Win 2003/Vista/XP/NT/2000/98/95, UNIX, LINUX |

Professional Experience:

Montgomery County Government, Rockville, MD

Mar 2019 – Current

Sr. Oracle Financials Developer

- Support 12.2.7 Workflow AME, PLSQL, OAF, SQL Developer, WINS CP3, J DEVELOPER 10g, SVN AP, AR, GL, CM, PO and PA.
- Developed custom program for making AP payments automation based on pay group.
- Developer custom program for bank Reconcile (CE) for AP, AR and PAYROLL transactions and batches.
- Developed and Customized standard Print statements report to have ability to print and send email output for customers.
- Setup AME workflow approval process for PO and AP modules.
- Resolved Performance Issue fix for Create Accounting program.
- Worked on GDF for applying data fixes in PO and AP modules.
- Working and Fixed critical production issues by debugging and technical analysis like credit memos are failing for Project awards, Credit card payments are failing. Etc. Identifying profile value changes, applying data fixes to resolve the issue.
- Developed custom program to view and delete PO's for which accounts are in draft status.
- Developed personalization to stop Ap invoice approval for specific users/ and distribution accounts.

Mahesh
Sr. Oracle Applications Techno-Functional Consultant
OAF ADF EDI WebAdi Expertise
Oracle ERP Cloud SAAS/PAAS Techno-Functional Consultant
maresh.guddeti@gmail.com
+1-8482198042
<https://www.linkedin.com/in/maheshguddeti>

Trac Intermodal, Princeton, NJ

Apr 2018 – Mar 2019

Sr. Technical Consultant

- Implementation 12.2.7 Multi-Phase, Workflow, Business Events, PLSQL, Splash BI Reporting, , OAF, SQL Developer, WINS CP3, J DEVELOPER 10g, SVN
EAM, CSI, PO, INV, AP, AR, GL, QA, iReceivables, HADOOP HIVE, APACHE NIFI.
- New EBS implementation 12.2.7.
- Working with cross teams like Big Data Hadoop data lake, Master Data Management and Data Analytics team.
- Outbound Data i.e. Initial data conversion/On-going Real time data transfer (Inventory Organizations, Inventory Locations, Installbase, Customers, Chart of accounts etc) from EBS to Big Data HIVE DB using oracle workflow business events, Oracle Advance queues and Apache NIFI.
- Developed new custom workflow from the scratch in oracle AR module to meet existing business requirement for AR approval process.
- Developed new custom OAF Page for transferring equipment from one organization to another organization.
- Developed new custom OAF Page to provide the mapping for the custom location codes and the attributes with the existing inventory organizations.
- Customized AP invoice workflow to include custom attributes and currency code in the approval page. This includes customizing seeded AP work flow and Approval notification OAF page.
- Personalized Install base OAF page to change labels and extended controller to perform validation against attribute values. (Remark date – attribute4 should always greater than current database value)
- Integration between Java applications/ EBS using oracle SOA and Webservices.
- Implemented AME for PO Requisition parallel approval based on Chassis/Axle category items.
- Implemented AME for PO workflow based on employee position hierarchy with amounts bucket.
- Providing data mappings for Core modules like GL, AP, AR, INV, and EAM modules.
- Developed EAM Conversion program for creating linking parent and child asset using Asset Genealogy Import.
- Developed custom business events that subscribed to seeded business events (HR Locations, AR invoices, AR Customers, Inventory Organizations, EAM modules) to send xml payloads when that event occurs.
- Developed oracle event alerts on seeded GL, INV, CSI tables to raise custom business events.
- Raising events manually, testing, debugging and monitoring business events.
- Writted custom PLSQL packages using DBMS_XMLDOM to generate XML payloads.
- Developed custom reports using Splash BI reporting tool.
- Personalized AR invoices form to display message when user tries to modify specific category invoices.
- Personalized FND Attachment form in Quality module to sort by latest records.

BoarsHead, Sarasota, FL

Jul 2017 – Mar 2018

Sr.EBS/ADF Developer[Remote]

- Enhancement 12.1.3, Java, UNIX Shell Scripting, SQL, PLSQL, ADF, SQL NAVIGATOR, WINS CP3, J DEVELOPER, 12C, SVN, INV, CST

Responsibilities:

- Designed ADF environment for integration with EBS 12.1.3 from the scratch.
- Implemented ADF with JAAS-methodology according to the ORACLE standards.
- Implemented ADF session and security features as per ORACLE standards.
- Developed new ADF custom page to maintain percentage of processing per warehouse dynamically controlled by custom lookup defined.
- Developed new ADF custom page to view/ search/ update cost of items using standard costing API.
- Performed unit testing and created test cases.
- Created technical design and migration documents.

<https://www.linkedin.com/in/maheshguddeti>

Subaru of America, Cherryhill, NJ

Oct 2016 – Jul 2017

Sr. Technical Consultant/ADF Developer

- Upgrade Project and Enhancement 12.1.3, 12.2.6, Java, UNIX Shell Scripting, SQL, PLSQL, OBIEE, , OAF, ADF, SQL NAVIGATOR , WINS CP3, J DEVELOPER 10g, 12C, SVN, Oracle Cloud. SAAS. DBCS.
OM, PO, INV, AP, AR, GL, MSCA, CSI

Responsibilities:

- Working with multiple EBS teams like Finance, Parts, Vehicles ERP teams.
- Developed custom application Capability Admin and Maintenance using oracle ADF Jdeveloper 12c, This application gives flexibility to user to enable and disable options and features for Subaru vehicles.
- Upgrading from 12.1.3 to 12.2.6 – Upgraded custom OAF pages (Core contracts custom application) from 12.1.3 to 12.2.6.
- Customizing custom PLSQL concurrent programs to restrict data set to sent to SXM based on vehicle generations.
- Developed ADF applications using oracle EBS(12.2.6) security features.
- Developing new ADF application for vehicles applicability where user can choose features and options for specific year and model of vehicles.
- Developed live updates program using oracle Advance Queue (Vehicle change, Vehicle state changes) where middleware can subscribe and send data to oracle cloud.
- Good knowledge on architectural changes from EBS 12.1 to 12.2 version, APPS edited and Non-Edited objects.
- Integration oracle HCM core and payroll modules with third party applications using webservices.
- Data loading (Import/Export) Oracle Cloud HCM modules.
- Developed BI Reports in oracle cloud.

Cummins Inc, Columbus, IN (Global Production Support)

Jul 2016 – Sep 2016

Global Production Support First Contact

- Upgrade Project/ Oracle Cloud Severs 12.2.4, Java, SQL, PLSQL, XML PUBLISHER, REPORTS, OAF, TOAD, WINS CP3, J DEVELOPER 10g, CVS
OM, PO, INV, AP, AR, GL, MSCA

Responsibilities:

- Cummins has multiple production instances and decided to rollout into two global production instances one for SCM and one for WMS with country/org specific.
- Initializing daily production standup support call with offshore and onsite teams Infosys, Cummins and KPIT.
- Analysing and Assigning tickets to responsible groups like DBA, Functional and Technical teams.
- Supported chat functionality using Skype where business users can chat with global support team.
- Created remedy reports understand inflow and analysis of tickets.
- Preparing technical and user facing re-usable solution documents where users/technical team can use for repeated tickets.

US Pharmacopeia, Rockville, MD (Enhancement and Production Support)

Feb 2016 – Jul 2016

Sr. Technical Consultant /OAF Developer

- Enhancement Project 12.1.3, UNIX Shell Scripting, Java, SQL, PLSQL, XML PUBLISHER, REPORTS, OAF, TOAD, WINS CP3, J DEVELOPER 10g, CVS
OM, PO, INV, OPM, AP, AR, QP, iStore and GL

Responsibilities:

- Customizing existing custom OAF to display location based on selected sub inventory and derives DFF attributes for that sub inventory dynamically. Make Read only and editable based on particular status.
- Analysis the change impact for existing XML publisher reports.
- Modified XML Data templates and RTF templates to add newly created sub inventory details based on delivery / order level.

Mahesh

Sr. Oracle Applications Techno-Functional Consultant

OAF ADF EDI WebAdi Expertise

Oracle ERP Cloud SAAS/PAAS Techno-Functional Consultant

mahesh.guddeti@gmail.com

+1-8482198042

<https://www.linkedin.com/in/maheshguddeti>

- Modified existing and also created new XML publisher reports in OM, AP, AR, PO and INV modules.
- Modified existing DB objects like TABLES, VIEWS, and PL/SQL Triggers, stored procedures, Functions and Packages for newly created sub inventory.
- Performing functional activities like creating orders, releasing orders, Shipping order.
- Performing functional setups like creating location, subinventory, adding responsibility to specific holds, sub inventory transfers script, etc
- Performed setups like Item assignment to Locator/Sub inventory, creating new responsibilities, assigning responsibilities to holds in OM.
- Created oracle external table for file based data loading and staging data validation program related to inventory items and categories.
- Performed front end tasks like Item Miscellaneous Transactions, Order entry, pick release, ship confirmation to test custom OM reports as part of unit testing.
- Performed front end tasks like creating different types invoices, validating, as part to test custom AP, AR reports as part of unit testing.
- Created new responsibilities, Release rules, sub inventory, location, shipping documents for newly created sub inventory.
- Created form personalization on order entry form.
- Preparing Migration scripts for changed objects to move into Production instance.

Subaru Of America, NJ

Sep 2014 – Feb 2016

Sr. Technical Consultant/ADF Developer

- Enhancement & Production Support 12.1.3 & Upgrade to 12.2.5, UNIX Shell Scripting, Java, SQL, PLSQL, REPORTS, OAF, SQL NAVIGATOR, WINSCP3, J DEVELOPER 10g & 11.1.1.6, SVN, MS Share point, WebLogic 10.3, CSI, INV, OM, AP, AR, QP

Responsibilities:

- Developing interfaces as per client requirement.
- Developed OAF custom page to call PLSQL procedures and update the data in custom tables.
- Developed ADF pages using oracle EBS security features by using JAAS.
- Developed custom methods in application module and using them in ADF task flows.
- Developed ADF page using images, icons, managed beans, ADF rich UI components like ADF layouts, input texts, buttons, command links, Boolean check box, etc.
- Defining custom CSS and configuring them in Trinidad configuration and skins (XML).
- Dynamic change of CSS on ADF components.
- Developed ADF pages using page fragments (JSFF) and used in bounded task flows.
- Developed SOA web service (WSDL) using BPEL to call PLSQL API.
- Invoking SOA web service in ADF page.
- Developed ADF page(JSPX) and unbounded task flow using switcher functionality to display multiple functionality pages in one page using links.
- Developed ADF page using multi shuttle functionality to apply add-on features for a carline and model year.
- Deployment and Integration of ADF pages with oracle EBS.
- Worked on developing and customizing business events and familiar with all components in business events and subscriptions with oracle middleware process.
- Implementation of EAM module including defining asset groups, categories, Rebuilding items, Defining Resources.
- Defining Resources, Departments, Activities in EAM module.
- Integrating EAM module with Inventory, BOM.
- Worked on Asset workbench
- Created new WMS related MSCA responsibilities based on the operating unit.
- Customized MSCA Pickslip page to add ability print BI Publisher report.
- Customization of EDI(856,810) Outbound and Inbound Programs
- Developed PLSQL custom API to load data into seeded tables.
- Coordinating with offshore team and providing technical solutions on the requirements.
- Creating new tickets for code changes and bug fixes.
- Worked with QA team to provide requested/required data as per their requirement.

Mahesh
Sr. Oracle Applications Techno-Functional Consultant
OAF ADF EDI WebAdi Expertise
Oracle ERP Cloud SAAS/PAAS Techno-Functional Consultant
maresh.guddeti@gmail.com
+1-8482198042
<https://www.linkedin.com/in/maheshguddeti>

- Worked closely with business user in requirement gathering and gap analysis.
- Developing and customizing reports as per requirement.
- Code Debugging and enhancements.

Rackspace Inc, TX (Production Support and Enhancement)
Lead Technical Consultant

Jul 2013 – Sep 2014

- Enhancement & Production Support 12.1.3, UNIX Shell Scripting, Java, SQL, PLSQL, FORMS, REPORTS, OAF, TOAD, WINSCP3, J DEVELOPER 10g & 11.1.1.6 , WebLogic 10.3, XML PUBLISHER, DISCOVER, ETEXT, WEBADI, Service Now, MS Share point OM, PO, QP, INV, AR, AP, GL

Responsibilities:

- Customized oracle seeded workflow and AP Invoice OAF page to display currency in the approval notification.
- Designed and developed complex requirements like integrating xml publisher reports into OAF pages.
- Code Debugging and enhancements.
- Developing and customizing reports / BI publisher reports.
- Developed Device and Account Level Products OAF Page.
- Developed Cloud account usage by customer OAF page.
- Converted custom forms into ADF pages functionality and integrated to oracle applications EBS.
- Developed custom ADF pages with list of values (choice list, auto suggest, input text lov), search, master detail with insert and update functionality.
- Developed ADF page with export to excel sheet functionality.
- Developed ADF page to import data from excel sheet into custom table.
- Developed custom ADF page template according to client standards.
- Developed ADF page to upload contract PDF's into the custom table column of BLOB.
- Developed and customized WEBADI (EXCEL) to upload data into oracle tables.
- Developed user responsibility listing report in e-Text output format to copy file into another server using XML bursting file.
- Unit testing tasks like creating invoices, validating sub ledger accounting, posting to GL etc.
- Modified Print selected invoice report as per client requirement.
- Customized AR Aging Report by account report.
- Fixed Assets Additions and Adjustments report.
- Fixing performance issues.
- Developing shell scripts and used for migration.
- Preparing Technical design and migration documents as per AIM standard.

Jacmel Jewelry, New York, NY (Upgrade from 11.5.10.2 To 12.1.3)

Jan 2013 – Jul 2013

Sr. Oracle Applications Developer/EDI Consultant

- Upgrade Project (11.5.10.2 – 12.1.3). 11.5.9, 12.1.3, Java, SQL, PLSQL, FORMS, REPORTS, TOAD, WINSCP3, XML PUBLISHER, EDI, WEBADI , OM, PO, INV, AR, AP, GL

Responsibilities:

- Responsible for upgrading concurrent programs/forms/EDI from 11i (11.5.10.2) to 12i (12.1.3).
- Developing WEBADI (MS EXCEL) forms.
- Upgrading RDF TEXT reports to BI Publisher Reports.
- AIM documentation like MD70, MD120.etc.
- Shell script for migration of code from one instance to another instance. Developed AR Invoices and credit memo WEBADI form for creating bulk invoices and credit memos.
- Developed AP invoices WEBADI form for creating bulk AP invoices.
- Modified and configured 850 POI EDI program according to R12 instance.
- Modified and configured 810 Invoice out bound EDI according to R12.
- Modified PLSQL and Oracle reports concurrent programs (oracle base tables) accordingly to R12.
- Modified Custom Forms according to R12 instance.
- Developed new shipping documents as per client requirement using BI publisher.

Mahesh
Sr. Oracle Applications Techno-Functional Consultant
OAF ADF EDI WebAdi Expertise
Oracle ERP Cloud SAAS/PAAS Techno-Functional Consultant
maresh.guddeti@gmail.com
+1-8482198042
<https://www.linkedin.com/in/maheshguddeti>

- Developed AR Invoice and Tax reports as per client requirement using BI publisher.
- Customized seeded Chart of Accounts Listing to BI Publisher reports to show output in EXCEL.
- Upgraded more than 50 custom reports as part of upgrade from 11i to 12.1.3

Beats, Santa Monica, CA (Implementation)

Aug 2012 – Jan 2013

Sr. Oracle Applications Developer

- Implementation 12.1.3, UNIX Shell Scripting, Java, SQL, PLSQL, FORMS, REPORTS, OAF, TOAD, WINSCP3, J DEVELOPER 11g, WebLogic 10.3 , XML PUBLISHER, WEBADI AP, AR, GL, PA, iSupplier Portal.

Responsibilities:

- Responsible for developing forms, reports, conversions, Interfaces, OAF pages and customizing workflow.
- Developed ADF page with Autosuggest LOV functionality.
- Developed ADF pages using BC4J components like (Entity Objects, View Objects, Application Module, View Link)
- Developed custom application UI using ADF pages (JSP, JSFF), task flow.
- Deployment of ADF application to Standalone WebLogic server and integrating it to oracle EBS.
- Implemented WEBADI for AP and AR bulk invoice import functionality.
- Responsible for unit testing, bug fixing and preparing Technical design and migration shell scripts and documents.
- Unit testing and code migration.
- Preparing documentation as per AIM standards.
- Implemented iSupplier portal setups like supplier registration, access, Responsibility level setups.
- Customized iSupplier OAF page tax tabular region to add new field to store royalty tax.
- Customized AP Check printing template to on bottom of page.
- Customized IBY packages to display custom attributes in payment processor.
- Communicating with client /onsite functional personal on business requirements.
- AP Aging report – Customized standard report to meet client requirement.
- GL Report- Customized General Ledger report to show EXCEL output.
- Developed new custom page based on staging table for correcting error records.
- Customized OEOL workflow (Order line should not be closed if attributes are not populated).
- Developed new custom forms to validate / edit / insert for WEBADI records.

GSE Systems Inc, Maryland, US (Enhancement)

May 2012 – Jul 2012

Sr. Oracle Applications Developer

- Enhancement Project 12.1.3, SQL, PLSQL, REPORTS, TOAD, WINSCP3, XML PUBLISHER AP, AR, GL, PA

Responsibilities:

- Responsible for developing various RICE component testing and migrating to Production.
- Responsible for developing various project accounting reports in EXCEL/PDF output.
- Responsible for fixing issues and customizing according to new enhancements/requirements.

Pomeroy, Cincinnati, OH (Implementation)

Jun 2011 – Apr 2012

Sr. Oracle Applications Developer/EDI consultant

- Implementation 12.1.3, SQL, PLSQL, REPORTS, TOAD, XML PUBLISHER, INTERFACES, OM, PO, INV, AP, AR, GL, PA

Responsibilities:

- Developing custom OAF Page to capture custom contracts data will be stored in custom tables.
- Added RMA number and receipt date in depot repair manager OAF page by extending the VO
- Developing custom 850,855,856, and 810 inbound and outbound EDI programs by using UTL FILE and UNIX schell scripting.
- Requirement gathering.
- Developing custom forms.
- Developing database objects like PL SQL packages, Triggers, Functions.

Mahesh
Sr. Oracle Applications Techno-Functional Consultant
OAF ADF EDI WebAdi Expertise
Oracle ERP Cloud SAAS/PAAS Techno-Functional Consultant
maresh.guddeti@gmail.com
+1-8482198042
<https://www.linkedin.com/in/maheshguddeti>

- Developing custom programs using standard API's to meet the client requirement.
- Post production support.

Euramax International, Duluth, GA (Implementation)

Feb 2010 – Apr 2011

Sr. Oracle Applications Developer / OA Framework Developer

- Implementation 11.5.10.2, UNIX Shell Scripting, Java, SQL, PLSQL, FORMS, REPORTS, OAF, TOAD, WINSCP3, J DEVELOPER, XML PUBLISHER, MS Share point.OM, INV, PO, CST, BOM, WIP

Responsibilities:

- Developed pricelist, sales order, purchasing, items, item categories conversion programs.
- Developed shipping inbound and outbound interface to exchange delivery and trip data with shippers common wealth.
- Converted useful existing DB views into new custom OAF search pages for users to help in their day to day activities.
- Developed new custom OAF page using Jdev 9 which allows to provide rebates (pricing API) to customer based on item category and the number of levels they reached. Master-Detail page with executing XML publisher report and has functionality to uplad BLOB files.
- Developed XML Publisher Reports.
- Worked with business users in requirement gathering.
- Performed GAP Analysis.
- Post production support.

Herbalife International, Torrance, CA(Production Support)

Jan 2009 – Jan 2010

Oracle Applications Developer

- Implementation & Production Support , Multi-Phase. 11.5.10.2, UNIX Shell Scripting, OPTIO, SQL, PLSQL, FORMS, REPORTS, TOAD, WINSCP3, Service Now, BMC.OM, INV, AP, AR, GL

Responsibilities:

- Developed OPTIO reports.
- Worked on Data fixes and code fixes.
- Performed unit testing for developed PLSQL concurrent programs.
- Customized PO approval work flow to add custom message note in the notification.
- Creating and updating tickets in BMC software.
- Preparing MD120 and MD70 documents.
- Worked on customizing AOL objects like Concurrent programs, Lookup, Value sets, Profiles, etc.
- Customized PL/SQL packages which generate XML data related to OM modules.
- Post implementation support.

Cummins Industrial Center, Seymour, IN (Implementation)

Jun 2008 – Dec 2008

Oracle Applications Techno-Functional consultant

- Implementation 11.5.10.2, UNIX Shell Scripting, SQL, PLSQL, FORMS, REPORTS, TOAD, WINSCP3, MS Share point. OM, PO, INV, Costing, BOM, WIP, GL

Responsibilities:

- Prepared functional, technical design documentation.
- UTP Installation documentation and Shell Scripts.
- Created the test cases.
- Performing unit testing and preparing unit-test cases.
- Developed XML reports.
- Developed data conversions in SCM Modules.
- Coordination with offshore team.

US Steel, Pittsburgh, PA – Deloitte, Hyderabad (Implementation)

Aug 2007 – Mar 2008

Mahesh
Sr. Oracle Applications Techno-Functional Consultant
OAF ADF EDI WebAdi Expertise
Oracle ERP Cloud SAAS/PAAS Techno-Functional Consultant
mahesh.guddeti@gmail.com
+1-8482198042
<https://www.linkedin.com/in/maheshguddeti>

Oracle Applications Programmer Analyst

- Implementation 12.0.3, UNIX Shell Scripting, SQL, PLSQL, FORMS, REPORTS, TOAD, WINSCP3, MS Share point OM, INV, PO, FA, AP, AR, GL

Responsibilities:

- Prepared functional, technical design documentation.
- UTP Installation documentation and Shell Scripts.
- Created the test cases.
- Performed unit-testing and preparing test-cases.
- Developed XML reports.
- Developed data conversions in HRMS, SCM, and Financials Modules.
- Coordination with offshore team.

LSI-Logic, Wichita, KS- Intelligroup, Hyderabad (Support)

Sep2006 – Jul 2007

Software Engineer - Oracle Applications

- Production Support 11.5.10.2, SQL, PLSQL, FORMS, REPORTS, TOAD, WINSCP3.OM, INV, PO, AP, AR, GL, WIP, BOM

Responsibilities:

- Oracle Applications Technical support for various components like Reports (RDF, Sql plus, discoverer), Interfaces, Alerts.
- Developed new components (reports, PL/Sql Procedures, packages).
- Developed the data fix scripts for processing sales order drop shipment process.
- Developed required scripts for Month end closing process for any struck records.

GE, China - Intelligroup, Hyderabad (Implementation)

May 2006 - Sep 2006

Software Engineer - Oracle Applications

- Implementation 11.5.9, SQL, PLSQL, REPORTS, TOAD, WINSCP3. OM, INV, PO

Responsibilities:

- Developed Oracle reports and Conversion Programs as per the requirements.
- System admin responsibility in Oracle Apps 11i (registering reports, executables, value sets).
- Prepared documents like MD70, MD40, and MD120 as per the standards.

GE Parts, Atlanta, GA – GENPACT, Hyderabad(Implementation)

Apr 2005 to May 2006

Oracle Applications Associate Consultant

- Implementation 11.5.10.2, SQL, PLSQL, FORMS, REPORTS, TOAD, WINSCP3 OM, INV, PO, AP, AR, GL

Responsibilities:

- Developed Oracle reports and Conversion Programs.
- System admin responsibility in Oracle Apps like registering reports and forms, defining value sets, alerts.
- Personalized PO standard form(Header level) to make non-required fields to required. Setup some DFF attributes to required.
