WORK EXPERIENCE

Associate Software Engineer - Napier Healthcare Solutions   Feb 2022 - Present
  Developed and implemented Java-based software solutions for Napier Healthcare Solutions. Contributed to all phases of the software development lifecycle, from requirements gathering to deployment. Implemented POJO classes, business logic, and DAO layers. Collaborated with team members to produce technical documentation and ensure successful integration. Utilized Git for version control.

PROJECTS

Hospital Information System (HIS)   May 2023 to till Now

Developed a Hospital Information System (HIS) to manage healthcare data, including electronic medical records (EMR). The system streamlined data collection, storage, and transmission, enabling healthcare professionals to access patient information quickly for accurate diagnosis and treatment. My role involved designing and implementing robust data management processes, ensuring data integrity and security, and collaborating with stakeholders to optimize system functionality. The HIS significantly enhanced efficiency and patient care within the hospital setting.

HRMS (Human Resources Management System)   Mar 2022 to April 2023

Implemented and managed an HRMS system, automating employee lifecycle processes, ensuring compliance, and streamlining performance reporting. Streamlined workforce operations, improved efficiency, and delivered accurate and timely data for strategic decision-making.
