## **CERTIFICATIONS**

- Masters Certificate Program in Project Management from Stevens Institute of Technology - Hoboken, NJ.
- Project Management Professional (PMP) Certification - ID# 1700304 from Project Management Institute (PMI).
- Web Development Certificate from Morris County Community College – Randolph, NJ.

## **PROFESSIONAL EXPERIENCE**

### **UPS Information Technology – Parsippany, NJ**

**June 2020 – February 2024**

#### **Software Development Engineer II (Sr.)**

#### **Intermediate Application Developer**

- Serve as subject matter expert for Accounts Receivables (AR) and Accounts Receivable and Collections (ARCS) invoice and payment transactions within the Billing applications.
- Experience with requirements gathering, design, sizing and estimating RFPs, coding, testing, and implementation of components within the Billing functional areas.
- Technical environment included TSO, COBOL, DB2, DB2 Stored Procedures, CICS, MQ Series, JCL, VSAM, File-Aid, IBM Utilities, Xpeditior, Changeman, Savers, ESP job scheduling, etc.
- Analyzes, designs, codes, tests, and documents moderate to highly complex application programs to ensure optimal performance and compliance.
- Creates technical documentation to communicate and update project teams and stakeholders.
- Performs applications maintenance and support functions to assist with problem resolution.

### **General Dynamics Information Technology – Oak Ridge, NJ**

**June 2018 – March 2020**

#### **Senior Programmer Analyst**

#### **Consultant/Sr. Programmer Analyst**

- Designed, developed, and supported the CMS's Healthcare Integrated General Ledger Accounting System (HIGLAS).
- Technical environment included Mainframe COBOL, JCL tools, DB2, CICS online and batch programs, TSO/ISPF, VSAM, File-Aid, IBM Utilities, Endeavor, Xpeditior, etc.
- Responsible for full Application Development life cycle activities (analysis, technical requirements development, design, coding, testing, implementation and support of applications software, etc.)
- Independently tests and verifies the results from simple to complex functions and develops ways to independently verify the test results.
- Verifies that changes meet the functional and technical specifications and proves that they do not adversely affect downstream systems.

**United Parcel Service I.T - Mahwah, NJ****October 2017 – March 2018****Consultant/Senior Application Developer, CDS Enterprise Business Intelligence Division**

- Designed, developed, and supported the Master Reconciler (MRC) application. This application captures all UPS scanned packages from drop off until delivery.
- Technical environment included TSO, COBOL, JCL, VSAM, File-Aid, IBM Utilities, Changeman, DB2, Savers, and ESP job scheduling.
- Responsible for full Application Development life cycle activities (analysis, technical requirements development, design, coding, testing, implementation and support of applications software, etc.)
- Participates in component and data architecture design, technology planning, and test planning / execution in support of Applications Development (AD) initiatives to meet business requirements
- Responsible for reading business requirements, developing code and working with the production support team to work through any issues and tickets, with a large offshore presence.

**UnitedHealth Group/OPTUM Technology - Basking Ridge, NJ****December 2016 – June 2017****Application Development Consultant**

- Designed, developed, and supported the UnitedHealth Group's Claims Adjudication healthcare application. This application streamlines the claims processing function through automation.
- Technical environment included COBOL, DB2, CICS, MQ Series, VSAM, JCL, SAS, Service Now, and OPC job scheduling, with a large offshore presence.
- Responsible for the Support and development for a Customer Data Delivery project dealing with a large reporting application. This application is reporting all of the data from a large member portal so the other groups are able to access and work with the data. Extracted files are send to clients via FTP or email for billing purposes.

**Automatic Data Processing (ADP) - Florham Park, NJ****August 2007 – August 2016****Lead Application Developer/ Scrum Master - Retirement Services Division****Senior COBOL Developer - Retirement Services Division**

- ADP completely embraced Agile/Scrum methodology implementation for all future development effort beginning July 2014.
- Used mainframe Jobtrac job Scheduling.
- Development and support with strong COBOLIII, DB2, CICS, DB2 Stored procedures, JCL, etc.
- Participated in and led teams of developers, quality assurance testers, and business analysts as Scrum Master. Facilitated all Agile/Scrum ceremonies for 2 agile teams collaborating with Product Owner.
