Experience

Software Engineer Intern / North American Bancard
MAY 2022 - AUGUST 2022 (Remote / Troy, MI)

As an intern at NAB, I worked remotely to maintain existing software systems. Using Ubuntu Linux, work was performed with PHP, Typescript, PostreSQL, Docker, Git/Bitbucket, Jira and Bamboo. These systems were crucial for the successful daily operations of the business. My team created alerts within these systems and responded to them as needed to guarantee our clients received the best service in the industry.

Skills

Javascript, C++, Java, Python, PHP, PostgreSQL, Linux, Docker, Git/Bitbucket, AWS, Android, MongoDB, Express, React, Node.js, Bootstrap, HTML, CSS

Education

Southern New Hampshire University / BS in Computer Science
JULY 2020 - GRADUATED APRIL 2023

4.0 GPA, Summa Cum Laude

Relevant Coursework:

- ➢ Data Structures and Algorithms
- ➢ Software Testing, Automation & QA
- ➢ Client/Server Development

Nucamp / Full Stack Web Development Bootcamp
MARCH 2020 - JULY 2020, ONLINE

This 4-month online bootcamp covered Full Stack web development using MongoDB, Express, React and Node. I gained experience with responsive design to accommodate web and mobile users. Github was used for collaborating with other students.

Soonchunhyang University / Global Village
FEBRUARY 2011 - JUNE 2011, SINCHANG, SOUTH KOREA

Santa Monica College / General Science
AUGUST 2007 - JANUARY 2011, SANTA MONICA, CALIFORNIA

Case Western Reserve University / Engineering Core
AUGUST 2005 - MAY 2006, CLEVELAND, OHIO
