Nicholas A. Zulanas

M. (719)237-0953   Denver, Colorado   Nickz1994@comcast.net

PROFESSIONAL EXPERIENCE

Saleesforce Consultant/ Contractor, Accenture Federal Services, Arlington, VA
Feb-2024- May 2024

- In Communities, I developed components working with an application wrapper to provide end users with capabilities to fill out and view applications which were tied to the Case object.
- Saved all data directly to the application wrapper to ensure the application process was not altered by any modification I made.
- I built modals to work with the application in multiple different scenarios with the application.
- Wrote out functionality to ensure users were unable to edit the application post submission and were able to see all of there filled out values (read-only).
- Wrote out solution designs for each ticket I was assigned.
- Completed all of my work within the expected time period.

Saleesforce developer, Ibotta, Denver, CO
October 2019 – December 2023

- Developed and designed custom Salesforce components to match the need of business using lightning web components and Apex solutions across multiple systems that integrate with Ibotta's Salesforce platform.
- Wrote integrations with budgeting services through AWS which we monitored through Datadog.
- Managed the deployment pipeline using Copado which we then switched to use GitHub.
- Created the company's only booking system for sales and ad display management system.
- Converted the company to use platform events and an eventbus logging system as opposed to future callouts.
- Trained multiple senior developers on the team how to use our system and documented useful information for any newcomers for the team.
- Built Multiple LWCs including one for creating opportunities for specific scenarios and another for associating generic objects to a parent object which were then sent to an exterior system.
- Revamped the companies entire integration system between salesforce and their budgeting system
- Created a custom LWC for displaying and editing push topics as well a live monitor for viewing them as the objects are edited.
- Developed an asynchronous service that accounts for specific custom settings and user permissions to send over 65 fields to another system with more than 5 nested child objects
- Built and set up a salesforce API to integrate with Looker Accounts
- Developed a generic platform event receiver service to confirm changes made by exterior systems to interior Salesforce back to the salesforce system

Reference: Jan Bennett, Senior Salesforce Architect - (303)204-1484

Web application and Junior Salesforce developer, Charles Schwab, Lone Tree, CO
April 2017 – September 2019

- Developed web applications both thick and thin client in C#, Angular7, JavaScript and Typescript. • Worked in database management for third party vendors in SSMS.
- Developed SSIS packages to manage the data imports from third parties for all internal trading accounts.
- Created multiple Microservices that communicate with APIs to receive data about accounts in context. I also developed the APIs they were communicating with and service wrappers.
- Developed a lightning web component holding two child components populated by outside services used to authorize clients in context that has a dynamically changing UI.
- Helped with designing the object flow that was best suitable for the company's Salesforce needs
Reference: John Springer, Senior Manager Software applications Engineering - (803) 556-9203

Web Application Developer (part-time), Unify Technologies, Fort Collins, CO
June 2016 – March 2017
- Work in Visual Studio to produce a web application that communicates with a MySQL server using MVC framework in C#, Razor(similar to ASP.net), Html5, jQuery and JavaScript.
Reference: Mike Herder, Engineering Manager - 1(970)391-3920

Technology Intern, Rabobank, Roseville, CA   June 2016 – August 2016
- Learned about banking processes and systems. Created SharePoint sites with workflows. Traced data elements throughout core systems of the Bank, and analyzed an application due for replacement to help improve the current business process.
Reference: Chriss Cabodi, Senior Vice President of Business Solutions - (916) 899-4841

IT Analyst Intern, Encompass Technologies, Fort Collins, CO
February 2016 – May 2016
- Supported customers by performing root cause analysis of their issues in a consultative manner. Coached customers on how to improve their business by using their software more effectively. Identified software bugs / defects and escalated.
Reference: Devin Marquez, Account Manager of Encompass Technologies - (970) 420-7433
