

**RAFFI, SHAIK**

**Email:** [raffiazure@gmail.com](mailto:raffiazure@gmail.com)

**Contact phone:** +1 (513) 353-8794

### **Profile:**

- **11+ years** of strong real time professional work experience in IT which includes technologies like Microsoft .Net full stack and Microsoft Azure Architecture, Web development, Design, Testing, Implementation and Maintenance of software applications proven record of shipping high quality software.
- Good experience on Designing and developing software applications with the Microsoft Azure, C# (6.0/5.0/4.0/3.0), .NET Framework (4.6/4.5/4.0/3.5), ASP.NET (4.6/4.0/3.5/3.0), JavaScript, jQuery, Web Forms, ADO.NET, Entity Framework, AJAX, LINQ, Web API, HTML, CSS, .NET Core, ASP.Net Core, SQL Server, REST full API, MS Unit.
- Work experience on Windows Azure, Azure Active Directory, Redis Cache, Azure Service Bus, Azure Functions, SQL Azure, creating resource groups, subscriptions, build definitions and release definitions.
- Proficient in handling responsibilities such as knowledge transfer, code review, compliance to best practices & standards, technology mentoring, assisting team members and customer training.
- Expertise in identifying, evaluating, and developing effective procedures and systems requirements that meet business requirements.
- Strong Object Oriented (OOPS) programming skills, extensively used in C# to design and develop the middle tier of the applications.
- Implemented SOLID Principles of OOPS Concepts.
- Emails in applications were being sent using SMTP With Azure Functions and Azure Graph API.
- Experience using No-SQL technologies- Azure Table Storage, Blob Storage, Queue, Document db
- Experience with an AGILE, Iterative and Waterfall software development methodology and Test driven Development including SCRUM Framework.

### **Education:**

- Electronics and Communication Engineering from Acharya Nagarjuna University (India) in the year **2011**.

### **Training & Certifications -**

- Microsoft Certified Professional on **AZ-204**: Developing Solutions for Microsoft Azure.
- Microsoft Certified Professional on **AZ-305**: Designing Microsoft Azure Infrastructure Solutions.
- Microsoft Certified Professional on **70-487**: Developing Microsoft Azure and Web Services

## **Working Experience:**

### **NCR Corporation India Pvt Ltd, 03/2021 To June 2023 Lead Software Engineer Responsibility:**

- Involving User stories discussion and estimations.
- Worked with client **Euro Garages and Amazon**
- Working on Design, having discussions with Manager to get it approval Once Design Finalized conducting Technical Meetings with team to task creation for User stories.
- Responsible for driving scrum and tracking task progress absence of Manager.
- Responsible for developing the application according to the requirements and design specifications.
- Involved in analysis, design and development and testing phases of the application development.
- Application built on .Net platform, which is an integration of several technologies like WPF, Azure, Web API etc.

**Technology:** WPF, C#.net, Asp.net Web API, SQL Server 2016, AJAX, JSON, XML, LINQ, Entity Framework, GIT, .Net Framework, Microsoft Azure (PAAS), Fortify.

### **Deloitte Support Services India Private Limited, 04/2018 to 03/2021 Technical Lead Role and Responsibility:**

- Involving user stories discussion and estimations. Working on Design, having discussions with Manager to get it approved.
- Once Design Finalized conducting Technical Meetings with the team to task creation for User stories. Responsible for driving scrum and tracking task progress absence of Manager.
- Responsible for developing the application according to the requirements and design specifications.
- Involved in analysis, design and development and testing phases of the application development.
- Involved in creating, modifying, and updating database tables, stored procedures in SQL Server 2016. Application built on .Net platform, which is an integration of several technologies like React JS, Azure, Web API etc.
- Worked on Power BI Reporting tool to develop reports for business users.
- Worked on Azure Data factory to migrate data from one server to another server Involved in Pipeline creation and Release build creation.
- Experience on Releasing application to Dev and performance environment Fixing performance issue if any in application.
- Involved on static scan and dynamic scan issue fixing. Used fortify to fix security issue and warnings.
- Used Entity Framework Code first approach for mapping data.
- Bug fixing involved using React JS.
- Worked with Web API with Azure cloud technologies like Azure Functions, Redis Cache, Azure Active Directory, Azure Service Bus, Azure SQL Server, Azure App Service, Azure Pipeline & Releases, Azure Data Factory, Azure Data Warehouse, Azure Application Insight, Azure Storage's.

**Technology:** C#.net, React JS, Asp.net Web API, SQL Server 2016, AJAX, JSON, XML, LINQ, Entity Framework, GIT, .Net Framework, Microsoft Azure (PAAS), Micro services, Microsoft Azure, AAD, ADF, Azure Service Bus, Functions, SQL Server, Application Insight, Blobs, and Table storage's, Fortify.

## **Affluent Technologies, 11/2017 To 04/2018 Senior Software Engineer Role**

### **and Responsibility:**

- Involving on User stories discussion and estimations. Working on Design, having discussions with the Manager to get it approval.
- Once Design Finalized conducting Technical Meetings with the team to task creation for User stories. Responsible for driving scrum and tracking task progress absence of Manager.
- Responsible for developing the application according to the requirements and design specifications.
- Involved in analysis, design and development and testing phases of the application development.
- Involved in creating, modifying, and updating database tables, stored procedures in SQL Server 2016. Application built on .Net platform, which is an integration of several technologies like React JS, Azure, Web API etc.
- Worked on Power BI Reporting tool to develop reports for business users.
- Worked on Azure Data factory to migrate data from one server to another server Involved in Pipeline creation and Release build creation.
- Experience on Releasing application to Development and performance environment Fixing performance issue if any in application.
- Involved on static scan and dynamic scan issue fixing. Used fortify to fix security issue and warnings.
- Used Entity Framework Code first approach for mapping data.
- Bug fixing involved using React JS.
- Worked with Web API with Azure cloud technologies like Azure Functions, Redis Cache, Azure Active Directory, Azure Service Bus, Azure SQL Server, Azure App Service, Azure Pipeline & Releases, Azure Data Factory, Azure Data Warehouse, Azure Application Insight, Azure Storage's.

**Technology:** C#.net, React JS, Asp.net Web API, SQL Server 2016, AJAX, JSON, XML, LINQ, Entity Framework, GIT, .Net Framework, Microsoft Azure (PAAS), Micro services, Microsoft Azure, AAD, ADF, Azure Service Bus, Functions, SQL Server, Application Insight, Blobs and Table storage's, Fortify.

## **Accenture 01/2016 To 11/2017 Software Engineer Role**

### **and Responsibility:**

- Responsible for Design, Develop, implement, and maintain web-based applications.
- Worked with client **Microsoft**.
- Worked with MVC Web API with Azure cloud technologies.
- Involved in creating, modifying, and updating database tables, stored procedures in SQL Server 2014.
- Application built on .Net platform, which is an integration of several technologies like C#.net and user controls.
- Developed presentation layer using HTML, CSS, C#.net, Asp.net and JavaScript.
- Used Entity Framework Code first approach for mapping data.
- Used Firebug to debug the front-end implementations.
- Worked on modules like Profile Management and Skill Management.

**Technology:** C#.net, MVC Web API, Angular JS, jQuery, LINQ, Microsoft Azure, AAD, ADF, Redis Cache, Type ahead Search, Application Insight, Blobs and Table storage's, SQL Server 2014, Visual Studio 2015

**Cigniti Technologies, 05/2015 To 01/2016 Software Engineer Role and Responsibility:**

- Analyze the user requirement and document design documents for the changes.
- Worked with client **Gallop**.
- Interact with the development team and enhance the existing functionality based on the user requirements and fixing bugs.
- Developed Web application using C#.net, Asp.net MVC technologies.
- Developed Restful web services with WCF.
- Designed UI using HTML and CSS. Worked extensively on web interfaces that involved development of client-side scripting using JavaScript and jQuery.
- Used Entity Framework for data access and mapping.
- Developed database queries and involved in writing stored Procedures.
- Involved in writing service class objects that depend on the data access objects.

**Technology:** C#.net, Asp.net, Asp.net MVC, SQL Server 2008R2, AJAX, JSON, XML, jQuery, LINQ, Entity Framework, TFS, WCF, .Net Framework, Restful web services.

**Quallent Technologies, 10/2013 To 05/2015 Software Engineer Role and Responsibility:**

- Analyze the user requirement and document design documents for the changes.
- Worked with client **2shared**.
- Developed Web application using C#.net, Asp.net MVC technologies.
- Developed Restful web services with WCF.
- Designed UI using HTML and CSS. Worked extensively on web interfaces that involved development of client-side scripting using JavaScript and jQuery.
- Used Entity Framework for data access and mapping.
- Developed database queries and involved in writing stored Procedures.
- Involved in writing service class objects that depend on the data access objects.

**Technology:** C#.net, Asp.net, Asp.net MVC, SQL Server 2008R2, AJAX, JSON, XML, jQuery, LINQ, Entity Framework, TFS, WCF, .Net Framework, Restful web services.

**Mind Ridge Software Technologies(I) Pvt. Ltd, 07/2011 To 10/2013 Software Engineer Role and Responsibility:**

- Designed User Interface Using HTML, CSS.
- Worked with client **ProdecoTech**
- Understanding the requirements from business users and end users.
- Experience in Creating Tables and Querying in SQL Server 2008.
- Worked on Integration of UI interface with SQL Server 2008 database.
- Developed web application using asp.net, JavaScript, C#.net. Involved in manual and functional testing Supported to Development team.

**Technology:** Java Script, HTML, CSS, XML, AJAX, Visual studio 2010, C#.net, Asp.net, SQL server2008, TFS.
