- Using Git to manage code changes and collaborate effectively within a team.
- Identifying and resolving issues, bugs, and errors within the application.
- Development.

Project Name: Dealer Management System

Project Description:

A dealer management system in plain terms is a software platform dealers use to manage their dealership. Often you will encounter the widely used acronym 'DMS' most commonly used for a Dealer Management System; however, in some cases, DMS refers to dealer management software, dealer management solution, or dealer management service.
