PROFILE

Recent Masters graduate with a keen interest in Java Full Stack development. I possess a solid academic background in computer science and have practical experience in both front-end and back-end technologies. Eager to apply my skills and collaborate on impactful projects as a Java Full Stack developer.

SKILLS

- Languages: Core Java, JDBC, Servlets, JSP, Basics of Python
- Web Technologies: HTML, CSS, Java Script
- Frameworks: Hibernate, Spring MVC
- Database: MySQL
- Software Tools: Git, VS Code, Eclipse IDE, Windows, Copado, ADO

PROFESSIONAL EXPERIENCE

Assistant System Engineer   03/2021 – 06/2022
Tata Consultancy Services   Mumbai, India
- Write, test, and maintain high-quality Java code for web apps and software products. Collaborate with the team to design, develop, and implement software solutions.
- Develop and optimize database queries and data access components. Work with databases to ensure data integrity and performance.
- Identify and troubleshoot software defects and performance issues, providing timely resolutions.
- Build and maintain web applications using Java, HTML, CSS, and JavaScript.
- Write unit tests to ensure code reliability and participate in quality assurance processes.
- Create and maintain technical documentation for code, APIs, and application architecture.

EDUCATION

Master in Science - Computer Science (MSCS)   08/2022 – present
University Of Central Missouri 🔗   Missouri, United States
CGPA - 3.44 / 4.0

Bachelor of Technology - Mechanical, KL University   07/2016 – 07/2020
CGPA - 8.87 / 10.0

PROJECTS

Library Management System   05/2023 – 07/2023
A Library Management System is designed to efficiently manage library operations, including book and user management, borrowing and returning books. In this, I focused on the basic operations: adding books, updating book details, deleting books, and reading book details.

Tru Yum Hotel Management System   01/2023 – 03/2023
The "Tru Yum Hotel Management System" is a software application designed to streamline the operations of a hotel. It covers various aspects of hotel management, including room and guest management, reservations, billing, and staff administration, all backed by a robust database.

CERTIFICATES
