Syed Talha

SAP PP-PI/QM/MM Functional consultant

Woodbury, MN 55129

✐ : smuhammad.sappp@gmail.com
☎ :

Professional Summary

- 5 years of experience as SAP PP functional consultant with MM, QM, SD, integration.
- Implemented 1 full-life cycle's implementation, Expertise in implementing **ASAP methodology**, and Significant experience with involvement in various stages of implementation right from **Business Blueprint**, **Realization**, **Unit Testing**, **Integration Testing**, **Cut-Over activity**, **Go-Live** & **Production Support**. User Acceptance Testing (UAT), User training and documentation.
- Involve in **Configuration**, **Up gradation**, **Customization**, **Master Data Setup** and Data Conversion, **As-Is** and **To-Be** designing, **GAP analysis**.
- Experience in diverse Industrial sectors such, **Chemical**, **Manufacturing**, **Food and Beverages**.
- Worked in **Discrete** and **Process Industries**.
- Worked extensively on PP master data such as Material Master, **Bill of Materials (BOM), Routing and Work Center.**
- Strong Configuration skills on **Demand management**, SOP, **Planning strategies**, **Lot sizing procedures**, **MPS** and Material -requirement Planning (Safety Stock, ROP and Time Fence) and Production Execution.
- Experienced in design and conceptualization of various planning strategies, **Make-to-Order**, **Make-to-Stock**, Planning with Final Assembly, Planning without Final Assembly scenarios
- Post implementation support for PP with emphasis on **MRP**, **Purchase Orders**, **Stock Transport Orders, Production Orders** and **Goods Movement**.
- Experienced in Inventory Management, **Goods Receipt**, **Goods Issue**, **Reservations**, **Movement Types**, Stock Transfer order, **Sub contracting**, Purchase order, goods invoice and Logistics Invoice Verification.
- Knowledge about **PI Configuration**: Resources, **Master Recipes**, **Batch Management**, Classification, **SLED, characteristics** and **Process order**.
- Data Migration from Legacy system to SAP for new implementation / integration, import data from any other external system to **SAP** using **LSMW, BDC and eCATT Tools**.

TECHNICAL SKILLS

ERP   ECC 6.0

Operating Systems   Windows, UNIX, MAC OS

Management Tools   MS Word, Excel, MS Project, iWork, Visio, ALMQC

Professional   Experience:

HB Fuller   **September 2020-Present**

Role: Global Process Stream Analyst

Responsibilities:

- Provided structured training for business/function(s) for maximum effectiveness.

- Has experience liaising with Super users/end-users to gather requirements, learn processes, and recommend solution options.
- Has worked closely with end-users during planning and integration efforts. He is also adept at training and creating user job aids. Has worked with challenging clients and helped guide decision making based on best fit for the customer.
- Involved in the GO-Live Preparation & Cutover activities, setting up planning variants, profiles, alert profiles, assigning profiles to user accounts, validating master data, and creating manual process orders etc.
- Supported the implementation of global IT standards

- Communicated global standards and guidelines to specialists and developers.

- Supported the implementation of new solutions, upgrades and/or enhancements to existing ones

- Heavily involved in the Master Data (BOMs, Master Recipe, Production versions)

- Have worked on NWBC (SAP user Interface)-Taught the users to sync the BOM from NWBC to SAP

- Conducting UAT before GO Live

- Got a good knowledge of ALMQC tool.

- Defect remediation experience, using HP Quality Center software to track user-submitted incidents.
- Involved in the GO-Live Preparation & Cutover activities, setting up planning variants, profiles, alert profiles, assigning profiles to user accounts, validating master data, and creating manual process orders etc.
- Providing on-going Hyper care support using SAP GRC system
- OCM Process Management/Training, Deployment, traveling across US, Europe for Go Live

Accenture   **November 2017– August 2020**

Clients:

Calumet, Indianapolis

Kerry connects, Beloit, WI

Upfield, Kansas

3M, St Paul, MN

CALUMET ERP enhancement

Dow Chemicals, MI

Role: System Development Specialist

Responsibilities:

- Work across the Service Delivery Lifecycle to analyze, design, build, test, implement and/or maintain multiple system components or applications for Accenture.
- Analyze, design, code and test multiple components of application code across one or more clients. Perform maintenance, enhancements and/or development work.
- Ability and aspiration to progress by deepening skills and/or developing new skills
- Accenture delivery Method (ADM)
- Create/ update, **unit-test** and deploy code/ configuration/ security/ environment based on design inputs.
- Plan, design, **script** and execute automated **functional tests** that ensure that all functional and business requirements are met by applications or systems.
- Provide skills and experience related to technology implementations and deployments, ensuring that products get to where they are needed and involving related professional including business analysts, technical analysts, solution architects and project managers.
