- Running
- Writing and Storytelling
- PC and Tabletop Gaming with Family and Friends

PROFILE

I have more than 20 years of experience across a broad range of technical fields. I started my career in 2002 in the United States Air Force where I was originally trained to be a "Computer Programmer" but quickly found myself working on many different IT, SysAdmin, DevOps, and Team Leadership roles. I've consistently proven myself to be an extremely fast learner with the ability to take on large challenges and perform distinctively under pressure.

EXPERIENCE

○ Senior DevOps Engineer

FM Global - February 2016 to Present
Collaborate with Development Teams to create software deployment automations and pipelines.

- Launched Event Driven Architecture effort with Azure Kubernetes and Confluent Kafka
- Built both Cloud and On-Prem Pipelines with ADO and Octopus Deploy
- Led team meetings, lunch-and-learns, and engineer led knowledge sharing events
- Designed and implemented a 135-step pipeline that reduced expected business impact from 3 weeks to 48 hours

○ Senior System Administrator

Nautic Partners - 2011 to 2015
Small Business, "Jack-of-all-Trades" Server and Network Support

○ Senior System Administrator

Silver Oven Studios - 2008 to 2011
Small Business IT Support and Senior System Administrator for the InvestorFlow CRM SaaS Product and Web Hosting Services

○ Comm. Systems Computer Programmer

United States Air Force - 2002 to 2007
Windows and *nix Administration for the Air Combat Command and National Security Agency
