PROFESSIONAL SUMMARY

Results-driven **Software Testing Engineer** with **3 years** of experience in **manual and automation testing, specializing in Java-based software development.** Up-to-date with the latest industry trends and technologies, ensuring a comprehensive understanding of current best practices. Proficient in *Selenium WebDriver, TestNG, and Cucumber for delivering high-quality Java applications*. Skilled in defect tracking using **JIRA and Rational CQ,** ensuring seamless software product. Experienced in **Agile Scrum** methodologies for timely project delivery. Strong analytical abilities with **ARO** and **Robotium**, complemented by database management skills in **Oracle** and **SQLite**. Additionally, proficient in **API testing** using **Postman**. As a detail-oriented and innovative professional, I am actively seeking **Manual Testing**, **Automation Testing**, **QA**, **BA** and **Java developer** roles where I can leverage my testing and Java expertise to drive software excellence. Experience in testing mobile applications for various industries, providing valuable insights for improving user experience and app performance.

CORE-COMPETENCIES

- Software Testing (Manual and Automation)
- Selenium WebDriver, Eclipse IDE
- TestNG, Junit, Maven
- Cucumber BDD, Rest Assured
- Defect Tracking (JIRA, Rational CQ)

- Agile Scrum
- Analyzing Tools (ARO, Robotium)
- Database Management (Oracle, SQLite)
- API Testing (Postman)
- Java

WORK HISTORY

11/2015 to Current

Gap

Obtained an H4 visa as a dependent, which unfortunately imposed work permit limitations, hindering my ability to engage in professional endeavors during this period. However, I am delighted to announce that I have now acquired the necessary work permit, and I am determined to reignite my career after a substantial interim period. Driven by an unwavering commitment to professional growth, I am eagerly looking forward to leveraging my diverse skills and experiences to make meaningful contributions within my chosen field.

12/2014 to 09/2015

Exploratory Software Tester

Moolya Software Testing Pvt. Ltd. – Bangalore, India
Client: Avaamo: A Business Messenger Application

- Aligned client requirements with anticipated functionality to ensure meticulous testing coverage.
- Conducted comprehensive functionality testing on mobile application features across diverse platforms.
- Analyzed and promptly reported application crash reports utilizing Crashlytics for expedient issue resolution.
- Collaborated proactively with the development team to meticulously scrutinize and address identified defects.
- Ensured impeccable quality under various network conditions and within distinct time zones through exhaustive end-to-end testing.
- Conducted mobile testing on Android and iOS platforms, ensuring compatibility and functionality across different devices, operating systems and time zones.

03/2013 to 06/2014

Associate Software Engineer

Accenture Pvt. Ltd. – Bangalore, India
Client: Largest Telecom Provider in France
Projects Garnered

- ✓ Sales and Subscription Application for Distributors
- ✓ Application for the Sales of Special Offers
- ✓ Dematerialization/Go Green

- Identified and prioritized critical elements, meticulously formulating comprehensive manual test scripts.
- Actively engaged in business requirement gatherings and review meetings, ensuring a comprehensive understanding of UAT testing scope.
- Streamlined testing processes and improved efficiency by automating test cases using Selenium WebDriver.
- Executed test scripts using Eclipse IDE on multiple browsers, meticulously verifying cross-browser compatibility.
- Strategically planned and analyzed Med D applications, specifically focusing on enrollment workflows and procedures, thereby contributing to the development of new or enhanced systems.
- Fostered close collaboration with stakeholders, including Business Analysts and Clients, to meticulously review requirements, designs, and test cases.
- Created and identified precise test data, meticulously executing detailed Batch, Online, and backend database testing (QA + UAT) to ensure strict adherence to requirements.
- Demonstrated a keen eye for detail by systematically identifying, reporting, and prioritizing defects, expediting their resolution, and effective issue management.
- Conducted extensive regression testing to validate and sustain existing functionality, ensuring uncompromising software quality.
- Ensured strict adherence to the UAT process and procedures, upholding alignment with application processing standards.
- Expertly utilized SQL Tools to perform efficient database queries and effectively validate test scenarios.

PROFESSIONAL TRAINING AND CERTIFICATIONS

- Successfully completed the "Selenium WebDriver with Java - Basics to Advanced+Frameworks" course by Rahul Shetty on Udemy in April 2023.
- Accomplished a diverse range of courses on Agile testing, API foundations, Test techniques, SQL, and more through LinkedIn Learning.
- Acquired expertise in Manual and Automation Testing (Selenium) through the esteemed Software Testing course offered by QSpiders, Bangalore.

PERSONAL ACHIEVEMENTS

Awarded with a 2015 Certificate of Appreciation for my invaluable contributions at Moolya Software Pvt. Ltd.

EDUCATION

06/2012

Bachelor's Degree: Computer Science
Goa University - Goa, India
