

# Yosef Asal

QA Automation Engineer

[yusufasalusa@gmail.com](mailto:yusufasalusa@gmail.com) || (229)-922-2345 || Atlanta, GA

Green Card Holder

Working in **IT Industry** for more than 5 years of strong hands-on experience in all the phases of Software Testing Life Cycle (STLC). Experienced in Automation, Web Testing, **BDD**, and Manual Testing across diversified domains like financial technology and Insurance.

## **PROFESSIONAL SUMMARY**

- Extensive experience of 5 years in IT industry in the areas of **Manual and Automation Testing** of web-based applications.
- Extensive experience of **Java** programming language for **QA Automation Engineer** with applying **OOP** concepts in development of testing frameworks for web-based applications with web service and database components.
- Proficient in Automation Testing Frameworks utilizing **Java**, **Maven**, **Selenium WebDriver**, **TestNG**, **JUnit** and **Cucumber**, including Hybrid, **BDD** and Data Driven frameworks.
- Proficient expertise in all processes of **Software Development Life Cycle** (SDLC), **Software Testing Life Cycle** (STLC), **Defect Life Cycle** (DLC), and **Agile Scrum Methodology**.
- Proven ability to utilize testing, version control tools, and languages like **Java**, **Selenium WebDriver**, **Cucumber** with Gherkin, **Maven**, **Jenkins**, **TestNG**, **JUnit**, **Postman**, **Git**, **Jira**, **SQL** and **Page Object Model (POM)**.
- Well versed in **Agile methodology**, including **Sprint Grooming**, **Sprint Planning**, **Sprint Demo**, **Sprint Retrospective** and **Daily Scrum**.
- Performed **Positive**, **Negative**, **Functional**, **Black Box**, **Smoke**, **Regression**, **UAT**, and **Front-End and Back-End Testing** both Manual and Automation for enhanced product quality assurance.
- Proficient experience of using **Continuous Integration** and **Continuous Development** using Jenkins.
- Strong hands-on experience of **Page Object Model (POM)** and **Page Factory** for Framework development.
- Strong hands-on experience in Database Testing using **MySQL Databases**, **JDBC**, proficient experience to create and execute complex SQL Queries to validate application back-end.
- Proficient experience in **API** Web Service testing using **REST Assured** Library (automation) and **Postman** (manual).
- Generated Extent-Reports, **HTML reports** and **Cucumber JSON reports** for status reporting.
- Excellent project management, organizational, prioritization and critical thinking skills as well as communication skills, team player and self-started, can work independently, while also working as an integral part of a team.

## **TECHNICAL SKILLS**

<b>Programming Language</b>	JAVA, SQL, HTML
<b>Testing Tool</b>	Selenium IDE, Selenium WebDriver, JUnit, Postman, TestNG, Cucumber
<b>IDE</b>	Eclipse, IntelliJ IDEA
<b>Build &amp; Integration Tools</b>	Maven, Gradle
<b>Test Management</b>	JIRA
<b>Version Control</b>	Git, GitHub
<b>Operating Systems</b>	Windows, Mac OS,
<b>Framework</b>	Cucumber BDD, JUnit, TestNG, DDT, REST-Assured
<b>Development Methodologies</b>	Agile-Scrum, Waterfall
<b>Databases</b>	Oracle SQL, MySQL
<b>Back-End Testing</b>	API, Postman, REST Assured
<b>Browsers</b>	Chrome, Firefox
<b>CI/CD Tools</b>	Jenkins, AWS Code Deploy

## **WORK EXPERIENCE**

**May 2022 - Present**  
**EVO Payments, Inc, Atlanta, GA**  
**Title: QA Automation Engineer**

### Responsibilities:

- Participated in Agile activities such as Daily Scrum, Sprint Grooming, Sprint Planning as well as sprint Retrospective Meetings.
- Performed functional, Smoke, Regression, integration, system testing including Back-End and End-to-End testing using API and MySQL Database.
- Test Planning and Strategy: Developing comprehensive test plans and strategies for payment system testing, considering factors such as security, compliance, and functionality.
- Test Case Design and Execution: Creating test cases based on requirements, functional specifications, and business scenarios. Executing test cases to verify payment processing accuracy, transaction flows, and error handling.
- Automation Framework Development: Building and maintaining automation frameworks for payment system testing. Utilizing tools and technologies such as Selenium, Appium, or similar to automate test cases and enhance test coverage.
- Integrated the Test Suites to GitHub which would bounce to Jenkins to execute automatically after every successful deployment.
- Created Selenium web-driver automation scripts using JAVA to validate business requirements on various browsers concurrently.

**March 2020 - April 2022**

**Priority, Alpharetta, GA**

**Title: QA Automation Engineer**

Responsibilities:

- Participated in Agile activities such as Daily Scrum, Sprint Grooming, Sprint Planning as well as sprint Retrospective Meetings.
- Collaborated within Scrum team with requirements analysis, domain and business specifics,
- Performed functional, Smoke, Regression, integration, system testing including Back-End and End-to-End testing using **API** and MySQL Database.
- Participated in development from scratch of **Cucumber** automation Framework using **Selenium** Web Driver, POM, Page Factory to create and execute automated Test Cases, generate test reports.
- Utilized CSS selectors, X-Paths to locate web elements in cross browser views, and Web pages, calling them in scripts to properly test UI.
- Performed manual functional testing to identify various critical points in the application and automated it by using **Selenium** Web-Driver with **Cucumber**.
- Design & developed data driven framework using **Selenium** WebDriver, **Cucumber** data tables and Apache POI (Excel).
- Configured **Selenium** WebDriver, **Cucumber**, Maven tool and created **selenium** automation scripts in **java** using **Cucumber** prior to Agile release.
- Verified, edited, and updated test data in new or existing systems before testing.
- Performed Back-End, End-to-End testing using Postman and MySQL (JDBC)
- Used customized X-Path to work with dynamic and static objects in **Selenium**.

Environment: **Selenium** WebDriver, **JAVA**, Maven, **Cucumber**, REST UI, **API**, Jira, MySQL, Agile, Windows, and Mac OS.

**February 2018 - February 2020**

**WellStar Health System Inc, Marietta, GA**

**Title: QA Automation Engineer**

Responsibilities:

- Participated in Agile activities such as Daily Scrum, sprint grooming, sprint planning as well as sprint retrospective meetings and lead the daily scrums when needed.
- Collaboratively worked with developers to change the locators in the UI.
- Created test plans for projects and presented it to PO's and developers.
- Analyzed and documented business requirement specifications, manually tested user stories assigned in JIRA board, wrote test cases based in manual testing steps using TestRail.
- Verified each resolution of all defects I logged/ created for the assigned project.
- Performed Manual Smoke, Functional, Regression, and Integration testing.
- Performed data accuracy, data validation, and data integrity testing by querying the database using SQL queries. Verifying the data tables on our database server.
- Used Gherkin with **Selenium** and created steps that non-technical people can also understand.

**EDUCATION: Georgia State University, Computer Science (In Process)**

# Yosef Asal

- Cumming, GA, US
