

**Desired Position: Oracle Senior Cloud Solution Architect/Developer (OPA/OJET/OIC/ODA)**

Senior Oracle Professional responsible for design, architecture and development of Oracle Cloud based Mobile (JET) and Web applications. Worked on Visual Builder Cloud Service, Visual Builder Studio, SaaS Extensions, SaaS Page Extensions, new SaaS Apps development to access external data and enable external Customers. Oracle SaaS Cloud OIC Integration includes experience with OIC HCM, ERP, EBS, EPM and SCM. Hands-on Oracle Cloud PaaS Visual Builder (VBCS), Oracle Integration Cloud (OIC) to build custom portal. Provided technical expertise in Oracle PaaS (OIC, VBCS, DBCS. Experienced on BPM/PCS Technical design on application integration and business project management case management applications using design specs for VBCS screens and PCS Web and mobile forms, PCS process and decision models. Extremely passionate about working in an Oracle environment with Oracle SaaS, PaaS and OCI.

## **Certifications**

### **SaaS/PaaS**

- Oracle Redwood Application 2023 Certified Developer Associate
- Oracle Cloud Platform Application Integration 2023 Specialist
- Oracle Procurement Business Process Foundations Associate Rel 2 (2023)
- Oracle Financials Business Process Foundations Associate Rel 2 (2023)
- Oracle Cloud Infrastructure 2023 Digital Assistant Professional
- Oracle Cloud Fusion Analytics Warehouse 2023 Implementation Professional
- Oracle Cloud Platform Enterprise Analytics 2023 Specialist
- Oracle Cloud Infrastructure 2023 Certified Architect Professional
- Oracle Procurement Cloud 2021 Certified Implementation Specialist
- Oracle Procurement Cloud 2017 Certified Implementation Specialist
- Oracle Manufacturing Cloud 2020 Certified Implementation Specialist
- Oracle Applications Cloud Security 2016 Implementation Specialist
- Oracle Fusion Applications 2014 Security Specialist
- Oracle Cloud Platform Application Integration 2021 Specialist
- Oracle Cloud Platform Identity and Security Management 2021 Certified Specialist
- Oracle Autonomous Database Cloud 2021 Certified Specialist (ADW/ATP)
- Oracle Machine Learning using Autonomous Database 2021 Certified Specialist (OCI)
- Oracle Cloud Platform Enterprise Analytics 2023 Specialist
- Oracle Cloud Platform Enterprise Analytics 2021 Specialist
- Oracle Cloud Platform Application Integration 2020 Specialist
- Oracle Cloud Platform Application Integration 2019 Specialist
- Oracle Cloud Platform Application Integration 2018 Specialist
- Oracle Management Cloud Certified Implementation Specialist (OMCS)
- Oracle Cloud Platform Application Development Specialist
- Oracle Database Cloud Service Specialist (DBCS)
- Oracle Java Cloud Service Associate (JCS)
- Oracle Enterprise Manager 12c Certified Implementation Specialist
- Oracle Exalogic Elastic Cloud Certified Implementation Specialist
- Oracle Application Grid Certified Implementation Specialist
- Oracle Database Cloud Administrator
- Oracle SOA Infrastructure Implementation Certified Expert
- Oracle WebLogic Server 10g System Administrator Certified Expert
- Oracle SOA Architect Certified Expert

### **IaaS**

- Oracle Cloud Infrastructure 2023 Certified Architect Professional (OCI)
- Oracle Cloud Infrastructure 2021 Certified Architect Professional (OCI)
- Oracle Cloud Infrastructure 2021 Certified Associate Architect (OCI)
- Oracle Cloud Infrastructure Security 2021 Certified Associate (OCI)
- Oracle Cloud Infrastructure 2018 Certified Associate Architect (OCI)
- Oracle Cloud Infrastructure Classic 2018 Certified Associate Architect (OCI-C)

## **Education**

- Advanced Program in MIS, State University of NY at Stony Brook, NY
- MS in Integrated Mfg. and Systems Management, SUNY at Stony Brook, NY
- Post-Baccalaureate degree in Supply Chain, (IIMM, Mumbai) India
- BTech (Mech. Eng.), NIT, Calicut (Calicut University), Kerala, India

## **Technical Skills**

- Worked on Oracle JET Mobile and Web application development using Microsoft Visual Studio code editor, with HTML, CSS, JavaScript, TypeScript, jQuery, Knockout, RequireJS, Oracle SaaS, PaaS and OCI REST API calls. Worked on OJET Web Components, Oracle JET Core Extensions and Audit Frameworks.
- Worked on Visual Builder Cloud Service, Visual Builder Studio, SaaS Extensions, SaaS Page Extensions, new SaaS Apps development to access external data and enable external Customers. Worked on Fusion Application Architecture design with RedwoodJS Stripe and SaaS Spectra back-end Architecture, App UI and VB Web Application with Visual Builder Studio CI/CD process. Worked on VB studio configuration of environments, projects, maintenance and deployments CI/CD pipelines and jobs.
- Worked on Oracle Process Automation business process to integration services from Fusion and External REST APIs Connector services and OIC Integration Services. Configured private TDE Encryption Master Key with Break Glass, Configured Basic, OAuth and OCI Signature Policy Global Credentials, Worked on OIC integration instance registration to use OIC integration Services on Process Automation business Process.
- Worked on HCM Journey creation and Journey Booster extension use case business process, registration on HCM Cloud as Employee Journey on Setup and Maintenance Workforce Information Checklist Integration.
- Worked on design, architecture and Development of Oracle Digital Assistant skills, intents, Utterances, Web Channels, Oracle ODA Web SDK node.js package and Oracle JET to integrate Oracle HCM, ERP modules with Oracle supplied ODA templates.
- Worked on ERP/SCM module Configurations, Security Implementations and OIC Integrations.
- Worked on HCM Fast Formulas, HDL, BI Publisher, OTBI, BICC Data Exchange/Extracts.
- Oracle Fusion Apps Customizations, Workflow Rules Development and REST API Integrations.
- Oracle SaaS Cloud OIC Integration activities using OIC HCM, ERP, EBS, EPM and SCM Adapters using inbound and outbound design patterns.
- OIC VBCS development and Integration with Oracle SaaS, Oracle PaaS and OCI.
- Fusion Security Console Administration and Integration with IDCS and Active Directory.
- IDCS Federation with Oracle SaaS, Oracle PaaS and OCI and On-premises Apps.
- Oracle PaaS Cloud configuration and integration with OCI IAM and IDCS Security.
- Cloud Integration with Oracle HCM, ERP, SCM, EPM, CX and 3<sup>rd</sup> Party SaaS Cloud.
- OCI Cloud Native application development and integration with Oracle PaaS Cloud.
- Oracle Fusion Apps OTBI reports, EFF and DFF development, customization, and integration.
- Oracle fusion Apps FBDI imports, REST API calls and Sandbox customizations.
- Programming and Scripting with NodeJS, Java, JavaScript, Python and Groovy.
- Worked on Oracle Visual Builder Add-in for Excel Form and Table layout, Business Object REST Services and Integrated Excel Workbooks and FBDI import templates.

## **Professional Experience**

### **LTIMindtree (05/2021- 08/2023)**

#### **Oracle Cloud Technical Architect**

- Worked on Coupa Supplier, Supplier sites and Remit-to Address, Chart of Accounts Segment validations, Currency exchange rates integrations. Worked on EBS migration and OIC Integration business Requirement design, Functional Design and Technical Design Documents for Supplier, Supplier Sites, Remit-to Address, Worked on EBS Integration and Migration projects with Oracle Integration Cloud on Procurement, Account Payables, Account Receivables, Chart of Accounts segments, General Ledger, Subledger integrations.
- Design and Architecture of Oracle Integration Cloud Instance creation, Message Packs, OIC version and requirement Analysis, conducting workshops to gather customers Inbound and Outbound integration requirements. Work with Outsourcing team on OIC integration architecture and development activities

and integration testing. Worked on Design and Architecture of Common Monitoring, Error Handling and Notification applications using Staging database.

## **Accenture (02/2021- 04/2023)**

### **Oracle Cloud Technical Architect**

- Worked on Web and Mobile application redwood Design and Architecture using Oracle Visual Builder Cloud Service and Oracle JET to integrate SaaS, PaaS and OCI services REST APIs. Worked on Process Cloud Service business automation services and Oracle Integration Cloud Services.
- Worked on Oracle Process Automation business process to integration services from Fusion and External REST APIs Connector services and OIC Integration Services. Configured private TDE Encryption Master Key with Break Glass, Configured Basic, OAuth and OCI Signature Policy Global Credentials, Worked on OIC integration instance registration to use OIC integration Services on Process Automation business Process. Worked on HCM Journey creation and Journey Booster extension use case business process, registration on HCM Cloud as Employee Journey on Setup and Maintenance Workforce Information Checklist Integration.
- Worked on Oracle Fusion migration activities planning, preparation, migration, testing, deployment and go-live support from different Oracle and Non-Oracle SaaS products like E-Business Suite, Coupa, Peoplesoft, Workday, Salesforce, SAP, Microsoft Dynamics etc. using Oracle Integration Cloud Service (OIC), IDCS, ODI, OCI Native Services, FAW, ADW, ATP, OCI AI and Generative AI Services, OACS and OCI Data Integration, VBCS, ODA and OPA Web and Mobile application development activities. Worked on Data Integration, Data Conversion, System Integration, User Training, Environment Refresh, ERP Administration, implementation of SOD, Advanced Access and Finance Controls, Data Warehousing activities.
- Design and develop integrations in OIC to Oracle SaaS Cloud including extracting Oracle SaaS Cloud data using Publisher reports, analysis and OTBI Reports. Designed and developed customizations using Visual Builder and Process Builder in OIC to Oracle SaaS Cloud. Provide hands-on technical and development support for implemented customizations using Visual Builder and Process Builder in OIC to Oracle SaaS Cloud.
- Experienced on Oracle JET Web Component and Single Page Application Developments. I worked on ReactJS, Binding Abstract layer (Knockout), AJAX, OJET Common Model API, WebSocket, REST API integrations, Internationalization, Security and Performance Tuning.
- Experienced on VBCS and Redwood Design with Oracle SaaS modules extensions and standalone VBCS application development for Process Automation. Worked architecture and design of OIC integrations with OCI Native Services like Observability and Application monitoring, Log Analytics, OCI Functions, OCI Monitoring, OCI Object Storage, Docker, Kubernetes Cluster, OCI AI Services, Kafka and OCI Streaming.
- Implemented several ERP FBDI, inbound, outbound, and bi-directional OIC integrations across multiple applications for Bank Statements, Lockbox and SFTP, Oracle ERP, Procurement, General Ledger, Payables, Receivables, Taxes, Assets and Cash Management.
- Implemented several HCM HDL, inbound, outbound, and bi-directional OIC integrations across multiple HCM applications for Benefits, Payroll, Recruiting, Learning, Compensation and Workforce.
- Implemented several EPM and SCM offerings and features, inbound, outbound and bi-directional OIC integrations across multiple EPM and SCM applications for Supply Chain Planning, Budgets/Planning and FCCS. Worked on ERP/SCM module Configurations, Security Implementations and OIC Integrations. OIC Process Application integration with Oracle Content and Experience Cloud for document and attachment routing for approval and review activities.
- Oracle Fusion Apps EFF and DFF development, customization, and integration. Worked on Oracle Fusion Apps Customizations, Workflow Rules Development and Approval Rules developments.
- Worked on ODI Integrations, OIC ERP, EPM, EBS and JCA Technology Adapters, Business Intelligence Cloud Connector (BICC) PVO Extractions, BIP Extractions, HCM Extracts, Fast Formula, BPM Worklists, Approval Rules, Financial BIP and OTBI Reports, Analysis and Dashboards.
- Worked on defining the Integration Strategy on how the Oracle Integration stack will be leveraged as Enterprise Integration Platform. Worked on activities to standardize the integration build by defining integration design patterns such as Error-Handling, Notification and Common Frameworks to build Enterprise-wide SaaS, PaaS and OCI components integration, these design patterns help to build flexible, scalable, de-coupled, reusable component-based integration architecture. Created OIC Integrations list required for whole HCM, EPM, SCM and ERP migration project.
- Worked on Enterprise Integration Architecture diagrams, Network Architecture Diagrams, Security Architecture diagrams. Worked on identifying the design patterns, business Objects involved, source and targets of different systems interfaces interactions. Defined Integration decision trees to help to select the integration pattern for building the interfaces. Created documents for functional design, technical design,

and testing of each integration interfaces explaining the integration design, assumptions, development activities, security, and transformation requirements.

- Worked on different strategy documents explaining Conversion, Testing, Extensions, Reports, Dashboards, Security, Archiving and Retention requirements for different OIC integration system interfaces. Oracle Cloud technical consultant who worked on solving complex business problems by designing and building integrations and extensions. Work on Performance testing to identify performance issues in PaaS solution and correct the issues. Provided analytics insights and solutions to solve business problems that are specific to client requirement. Responsible to implement OIC Integrations, perform production deployments and to provides support on OIC issues.
- Experienced on Developing Integrations between Oracle Financials cloud and other Legacy applications using OIC (Oracle integration cloud), Fusion OTBI (oracle transactional business intelligence) reporting and hands-on experience with BI publisher, performance monitoring, operational monitoring in Oracle Fusion, experienced in custom app creation using VBCS and PCS (process cloud service), Experience with setting up CI/CD job to automate the OIC, DB and VBCS code migration.
- Worked on Oracle Business Network (OBN) Trading Partner Registration, Connection Management, Messaging Configuration, Supplier Punchout and Catalog configuration, Buyer and Seller Document Exchange configuration and Mappings. Worked on OIC B2B message transactions and EDI documents and message communications.
- Worked on Oracle PaaS Cloud configuration and integration with OCI IAM and IDCS Security. Cloud Integration with Oracle HCM, ERP, SCM, EPM, CX and 3rd Party SaaS Cloud. Worked on Oracle Cloud Infrastructure and IDCS Administration, SSO Federation with SaaS/PaaS/OCI IAM, Worked on Integration Architecture design and developing Architecture diagrams for customer EBS and 3rd Party Application migration projects to Oracle Cloud SaaS modules (ERP, HCM, EPM and SCM).
- Worked on Oracle API Gateway, Digital Assistant (ODA), Kubernetes Clusters, Serverless Functions, Insights & Analytics, OCI IAM, Object Storage, Process Automation, Data Integration, OCI Streaming, Kafka Streaming and Log Analytics.
- Experienced on Create technical designs, build and unit testing for complex custom applications using Oracle PaaS VBCS and OIC. Hands-on Oracle Cloud PaaS Visual Builder (VBCS), Oracle Integration Cloud (OIC) to build custom portal. Provide technical expertise in Oracle PaaS (OIC, VBCS, DBCS). Excellent understanding of Oracle PaaS4SaaS extension patterns and Oracle Cloud Infrastructure (OCI) and PaaS4SaaS architecture. Understanding of Oracle Cloud SaaS and OCI application and integration data security. Knowledge of Oracle HCM, ERP, EPM and SCM functional setups and configurations as well as REST APIs/web services.
- Worked on HCM (Job roles, Data roles and Security Profiles), ERP and SCM Job roles, Duty roles, Privileges, Data and Functional Security profiles, Security Contexts, Security Least Privilege Principles and SOD configurations. SaaS security Console and Setup and Maintenance Administration, OIC integration, IDCS Cloud Security Administration, SaaS, PaaS and OCI Cloud Security Administration. EPM cloud Security Administration, Enabling SaaS, PaaS and OCI Cloud subscription and security configurations.
- Worked on technical analysis, development, customization, implementation, integration, and upgrade of Oracle Enterprise Cloud HR, SCM, EPM and Financials applications across multiple industries and verticals. Analyzed business processes, data processing systems and mapping business processes to Oracle systems. Designed data migration strategy and performing end-to-end migration of legacy data to Oracle systems. Created technical specifications for development and implementation of Oracle product modules. Implemented customizations and enhancing modules, assessed development and enhancement needs, designed, and developed inbound/outbound interfaces to integrate Oracle modules and external systems. Created test documents and performed unit and integration testing and developed user documentation and assisted in providing deployment and post implementation support. Oracle ERP Cloud Technical and Integration activities. On-Premises application migrations to EPM/ERP activities, OIC ERP Adapter integration activities. Oracle Cloud Administration. Procure to Pay technical and functional activities, Risk Management Advanced Controls, Risk Management Controls, Processes, Issues, Models, Entitlements and Conditions, SOD Analysis, Certifications and Validations. Worked on EPM products security setup on IDCS and configurations.
- Worked on Business Intelligence Cloud Connector (BICC), HCM Extracts, Fast Formula, BPM Worklists, Approval Rules, Financial Reports and Dashboards from EPM and Essbase data sources. Oracle SaaS implementation architecture, security, and Integration Strategy development and Implementation. Worked on OCI Architecture design for Analytics and AI/ML Services with components VCN, Internet Gateway, OCI Streaming, Data Integration, Object Storage, Autonomous. Database, Data Catalog, Dataflow, OCI Data Science, Oracle Analytics Cloud, OCI Functions, Identity Cloud Service and Oracle Integration Cloud Service.
- Worked on design and develop integrations in OIC to Oracle HCM Cloud including making REST/SOAP API, HDL and FBDI File inbound Integrations and HCM Extracts, BICC bulk uploads for External System

integrations. Worked on BRDs, Functional and Technical Design Documents, Hands on integrations on OIC. Worked on Common Error handling and Notification integration frameworks on OIC. Working with outsourcing team for integration development activities, troubleshooting the integration issues and bottleneck analysis and Unit testing and SIT.

- Worked on Process Automation structured and Dynamic business process, Webforms, approval rules and Decision Tables, integrations with external REST APIs and OIC Integrations, Global (Fusion Job Roles) and Private application Roles, Business Types and List of Values for Fusion HCM application extensions and customizations. Worked on HCM Journal
- Worked on managing functional and Technical Specifications and integrating different software packages, managed workstream deliverables and meeting project deadlines, provided different OIC integration hands on functional and technical analysis, design, unit testing, UAT and SIT testing, implementation and post implementation support after production live.
- Worked on customer workshops to gather current integrations to develop future inbound and outbound integration requirements and identifying the design patterns like REST API, SOAP API, Events, BIP extractions to be applied for each integration.
- Worked on Oracle Visual Builder Add-in for Excel Form and Table layout, Business Object REST Services and Integrated Excel Workbooks. OIC VBCS development and Integration with Oracle SaaS, Oracle PaaS and OCI. OIC Integration with Oracle HCM, ERP, SCM, EPM and 3<sup>rd</sup> Party SaaS Cloud. OCI DevOps, Visual Builder Studio, Cloud Native application development and integration with Oracle PaaS and OCI Cloud Services.
- Worked as part of a team of Integration consultants, the primary role will be the development of Oracle SaaS cloud application Extensions, Oracle Integration Cloud (OIC) Integrations and client specific customizations, solving complex business problems by designing and building integrations and extensions. Worked on OIC integrations with Fusion BSN Trading Partners and Banks using B2B and BAI2 Integrations.

## **Perficient Inc.**

**(03/2020-02/2021)**

### **Lead Technical Consultant (ERP and SCM)**

- The Oracle Integration Cloud Developer will work with the Oracle Integration Cloud to develop and enhance OIC integrations with Oracle ERP Cloud, EPM Cloud and Third-Party Systems. Technical experience with integration on middleware platform in iPaaS focused on either Oracle SOA Cloud and/or Oracle Integration Cloud (OIC). Ability to leverage pre-built integrations, cloud adapters, on-prem adapters, connections, SaaS applications. Assist client in preparing validation scripts, testing scenarios and develop test scripts. Experience in Oracle Integration Cloud for building complex integrations, working on connecting various on-prem, SAAS applications. Experience on design and Architecture experience in OIC- Oracle Integration Cloud, Process Cloud, SOA Cloud, API Cloud Service, IOTCS and Blockchain Cloud Service. Experienced in Oracle SOA fusion middleware and Complex orchestration flow building in Oracle OIC.
- Worked on Oracle Cloud Reporting Technologies Data Extract, BI Publisher, SQL, PLSQL, OTBI and Data migrations and integrations using HDL, FBDI, Business Events, SOAP, REST APIs and Oracle RICE component development. Experienced on VBCS application development and integration with OCI Object Storage, ATP, Digital Assistants, SaaS/PaaS/OCI REST APIs, SSO with IDCS. Experienced on FBDI manual imports and automated imports using OIC with UCM and ERP and SCM modules. Experienced on Loading Objects and Custom Object data using File Based Loader (FDL) in Application Composer, Import/Export and Manage File Imports tasks using Module and MDM Administrator Roles. Extensive technical background with expertise in SaaS, PaaS and IaaS models in Public, Private and Hybrid Clouds to enable enterprise transformation and developing strategic solutions. I have a proven track record of technical Cloud integration experience spanning several functional disciplines EBS, NetSuite, Salesforce, ERP, HCM and SCM SaaS Cloud Technologies.
- Experience on ERP and SCM Job roles, Duty roles, Privileges, Data and Functional Security profiles, Security Contexts, Security Least Privilege Principles and SOD configurations. Experienced on Fusion SCM Order Management Extensions (Groovy), Non-Fusion Integrations, Pause Tasks Rules (based on events, timer and line items status) and Release Rules, Extensible Flex Fields on OM, Oracle Business Rules (Pre-Transformation, Post-transformation, Product Transformation, Process Assignment Rules, Routing Rules), OM Constraints and Compensation Rules.
- Experienced on latest ERP/SaaS data import and data loading tools with prebuilt Technology and Application adapters. Experienced on BI Publisher (BIP) and Oracle transactional Business Intelligence (OTBI) reports and data migration (CSV import & export). Strong hands-on experience in Fusion Extracts, OTBI Reports, and BI Publisher, Oracle SCM/ERP downstream integrations, up-

stream integrations with finance modules.

- Experienced on enabling fusion offerings and features and worked closely with business partners to deliver analytic capabilities and support business strategies and objectives for new business process designs and applications. Reviewed existing external systems and interfaces to identify inbound and outbound integration endpoints with internal and external (third party) applications.
- Extensive knowledge of Oracle ERP and SCM functionality and process as well as Oracle Cloud ERP and SCM APIs/web services. Technical problem-solving skills with ability to work independently or in a team-oriented environment. Experienced on PaaS solutions to build end to end custom cloud solutions with Oracle SaaS and ERP modules REST APIs integration. Experienced on OIC integration and automation of data flows for Oracle on premise and Oracle Public Cloud applications across multiple modules (CX, HCM, ERP, SCM, MDM, Finance).
- Experienced in multiple Identity and Access Management solutions such as authentication, authorization, federation using OpenID OAuth and SAML. Knowledge of Regulatory Compliance frameworks and applying new techniques to meet security and governance in public cloud architectures. Experienced in Oracle Integration Cloud Services and Oracle Integration Cloud implementation on Oracle Cloud Infrastructure with IAM policies and federation with IDCS authentication and authorization. Excellent understanding of Oracle PaaS4SaaS extension patterns and Oracle Cloud Infrastructure (OCI) and PaaS4SaaS architecture. Understanding of Oracle Cloud SaaS, PaaS and OCI integration data security.

## **Oracle Corporation**

### **Advanced Principal Consultant (FMW/SOA/BPM/PaaS/PLSQL)**

**(2010-2020)**

- Experience on integrating Oracle E-Business Suite with Oracle SOA Suite (SOAP/REST Webservices, BPEL, Mediator, E-Biz Adapter, XML, WSDL/XSD). Provide Technical consulting services by acting as technical expert and leading clients through the entire Cloud application services implementation. Worked on integration POCs to implement new custom integration patterns using SOA, BPM, MFT, Kafka, AQ, JMS, REST, SOAP, Salesforce and EBusiness Suite. Worked on BPEL and BPMN Business process application development and troubleshooting.
- Worked on Web and Mobile application redwood Design and Architecture using Oracle Visual Builder Cloud Service and Oracle JET to integrate SaaS, PaaS and OCI services REST APIs. Worked on Process Cloud Service business automation services and Oracle Integration Cloud Services.
- Experienced on distributed System integration using Oracle Integration Cloud components such as VBCS Web and Mobile Applications, Integration Cloud Applications, Business Process Cloud Applications, IOT Cloud Service, SaaS and ERP Adaptors and connectors for REST APIs integrations, Cloud Agents integration with on-promise applications. Experienced on connecting On-promise Applications with Oracle Integration Cloud. Extensive skills in application integration including planning, designing, building, implementing, and supporting application integrations.
- Extensive understanding of Oracle PaaS4SaaS extension patterns and Oracle Cloud Infrastructure (OCI) and PaaS4SaaS architecture. Created technical designs, build and unit testing for complex custom applications using Oracle PaaS VBCS and OIC. Hands-on experience Oracle Cloud PaaS Visual Builder (VBCS), Oracle Integration Cloud (OIC) to build custom portal. Extensive skills in application integration including planning, designing, building, implementing, and supporting application integrations. Strong knowledge and experience on large production and DR implementations with OWSM, SOA, OSB, BPM and BAM WebLogic Domains and large integration projects. Good knowledge of OSB, BPEL, B2B, ODI, MFT, XML, XSLT, XQuery, XSD, WSDL, JSON, REST, HTTP, SOAP, YAML, Sockets and APIs.
- Experienced on OIC prebuild application adapters and best practice implementations for integrating Oracle SaaS, ERP and Fusion applications REST APIs. Support configuration, development, testing, and deployment of new Oracle Cloud functions and features maintained system configuration changes including business processes. Experienced on BPM/PCS Technical design on application integration and business project management case management applications using design specs for VBCS screens and PCS Web and mobile forms, PCS process and decision models. Experienced on custom business objects, Flex fields, lookups, process workflow components and actions for applying Oracle best practice on OIC business process flows and integrations.
- Experienced on VBCS application development and integration with OCI Object Storage, ATP, Digital Assistants, SaaS/PaaS/OCI REST APIs, SSO with IDCS, experienced on FDBI manual imports and automated imports using OIC with UCM and ERP and SCM modules. Experienced on Loading Objects and Custom Object data using File Based Loader (FDL) in Application Composer, Import/Export and Manage File Imports tasks using Module and MDM Administrator Roles. Experienced on Create technical designs, build and unit testing for complex custom applications using Oracle PaaS VBCS and OIC. Hands-on Oracle Cloud PaaS Visual Builder (VBCS), Oracle

Integration Cloud (OIC) to build custom portal. Provided technical expertise in Oracle PaaS (OIC, VBCS, DBCS).

- Experience designing and implementing Application APIs using Apiary and API Platform Cloud Service Management Portal for creating policies, users, grants and roles. Experienced on production and development Gateway node deployment and monitoring API gateway for better security and access control. Experienced on discovery, subscription and invoking APIs for application development using API Developer Portal. Experienced on Oracle Internet of Things (IOT) Cloud Service analytics processors, device registrations and device life cycle management, creating IOT users and Roles, reading and streaming device data and events for tracking customer behavior and systems monitoring by detailed analysis using APIs. Strong experience in API development based on Oracle Middleware products, developing and integrating solutions with on-premises and Cloud oracle Applications and Fusion Applications.
- Extensive implementation experience with Oracle SOA Suite 11g/12c (BAM, BPEL, XML, WSDL/XSD) and Oracle Service Bus (OSB) and Oracle BPM 11g/ 12c Suite. Experience in performance tuning, testing and diagnosis of large BPM/SOA production sites. Extensive Experience on Cloud Data Conversion processes inbound and outbound interfaces, integration using Oracle SOA, BI Publisher, PaaS Integration Cloud Service (ICS) experience. Oracle ERP cloud solutions optimization related to information technology operations, business processes, security, and data integrity for the applications. Mentoring developers leading in technical design and framework development and execute the day-to-day activities of Oracle Cloud Technical engagements for a variety of clients including process design, implementation lifecycle support, and project reviews.
- Experience on Identifying business requirements and map them to the Cloud functionality, functionality gaps and build extensions for them, advise client on options, risks, and any impacts on other processes or systems, support clients with the execution of test scripts, lead migration of configuration, integrations, and extensions to production. Experience on interacting with the project team members responsible for developing reports, interfaces, data conversion programs, and application extensions, provided status and issue reports to the project manager/client on a regular basis.
- Excellent technical problem-solving skills with ability to work independently and in a team-oriented manner. Expertise with MS Visio, MS Power Point, MS Word and MS Excel. Excellent client interfacing skills, working with IT and well as business stakeholders. Extensive skills in application integration including planning, designing, building, implementing, and supporting application integrations.
- Extensive experience on Single-Sign-On (SSO) integration and federation with multiple identity providers and Service providers using OAM/OIM, Active Directory, OAuth and OpenID.

### **Independent Consulting Experience (10/02 – 06-2010)**

Installation, Administration, Configuration, Monitoring, and Troubleshooting, Performance Tuning of FMW SOA and BPM domains. Supporting different production engagements involving Troubleshooting WebLogic Integration workflows, WebLogic, SOA, BPM, ADF, BAM and OAM on WebLogic Server Domains. Worked on WebLogic security providers for SAML SSO implementation. Created and configured SAML Identity Asserter and SAML Credential Mapper security providers for WS-Security Implementation. Created and configured SAML source site, destination site, asserting parties and Relying Parties. Worked on Asserting Authority. Created Policy files for securing the deployed web services. Hands on experience on WebLogic Integration, WebLogic Portal, ALSB/OSB, BPM and SOA domain configuration. Installation/Configuration and Integration of OIM/OAM 11g PS2 components OIM connectors with multiple systems. SOA Provisioning using Oracle Enterprise Manager, FMW plugin, JMS, Data Source monitoring Metric Templates, Designing and creating OEM12c Administration groups and Monitoring Templates.

### **JPMorgan-Chase (Middleware Arch. Group) Dallas, TX**

**05/01 –10/02**

#### ***Senior Technology Officer***

Designed and configured Middleware banking integration Architecture components, Java, J2EE and Python programming, shell scripting, Web and Mobile Application development using JSP, Java and JavaScript, HTML, CSS. Worked on MQ Workflow, MQ Series and MQSI, WebSphere and WebLogic Application Servers. Banking transactions and EDI and XML B2B message integration middleware architecture and programs using Java and Python multi-thread programming.

### **ACS (E-Solutions), Dallas, TX**

**06/00 to 05/2001**

#### ***System Architect***

Designed and architected different Internet applications using XML, EDI, WSDL, SOAP, EJB, JMS, JNDI, JSP, Servlets and DAOs with iPlanet Application and Portal Server. Defined enterprise J2EE standards and best practices for developing solutions that will ensure code reusability and high system availability. Programming of PL/SQL store procedures and packages. Writing UNIX shell scripts and troubleshooting application integration issues.

**Associates Information Systems (Citi Group), Irving, TX**

**01/98 to 06/00**

***Senior Programmer Analyst***

Java, JSP, Servlet, Applet, XML and J2EE programming. Worked on Visual Basic to Java Mortgage application conversion Project. Designed and developed CORBA (Visibroker for Java) based Mortgage Application framework and building middleware infrastructure with MQSeries APIs, Rational Rose modeling and scripting, Java Swing Applet development and testing. Developed multi-tier applications with java web front end and business logic implemented as CORBA (Visibroker for Java) and Oracle as backend. Worked on MVC patterns and other Gang-of-Four design patterns, SQL and PL/SQL packages, functions and store procedures on Oracle database.
